Revenues in the 3rd quarter rose by 19.1% over the same period last year as system wide sales, a measure of all sales to consumers both from company-owned and franchised stores grew by 18.4%, the fastest growth registered so far in 2011. Sales growth in the Philippines accelerated to 19.7% spearheaded by Chowking which grew by 13.2%, Red Ribbon by 11.0% and Mang Inasal which now contributes 8.2% of JFC's worldwide sales. Sales from foreign businesses grew by 13.5% led by China which rose by 21.4%, Vietnam by 23.1% and the Middle East by 23.6%, partly offset by a slowdown of sales in the United States.

Jollibee Foods Corporation Chairman and Chief Executive Officer, Mr. Tony Tan Caktiong stated that the acceleration of sales growth in the Philippines was driven mainly by the continued improvement in product quality and product value offering across the brands and by the continued expansion of Mang Inasal. "We look forward to offering our consumers even better products and value proposition in the months ahead as we gain from the strength of our Marketing, Product Research & Development and Supply Chain", he stated.

Mang Inasal grew its store network to 400 restaurants, matching Chowking as the country's second largest fast food chain in terms of store network, behind Jollibee with 733 stores.

For the first nine months of the year, JFC's revenues and system wide sales grew by 16.6%.

JFC's Net Income Attributable to Equity Holders of the Parent rose by 4.1% in the 3rd quarter versus the same period last year, reversing the trend of -9.9% in the first quarter and -6.8% in the second quarter. JFC Chief Financial Officer, Mr. Ysmael V. Baysa stated that profit margins had improved versus the previous two quarters resulting from stabilizing raw material prices, price adjustments and cost management. "We look forward to the continued stabilization and even improvement in raw material prices locally and abroad in the months ahead such that gross profit would track or even outpace sales growth," he commented.

For the first nine months of 2011, JFC's net income attributable to equity holders of the parent declined by 4.2% versus the same period last year. This represented an improvement in trend compared with the 8.3% decline registered in the first six months of 2011.

Mr. Baysa disclosed that JFC's gross product margin had been improving in the past six months versus the first quarter of 2011. "Our gross product margin in the 3rd quarter of 2011 was already equal to that of the same period last year, excluding the effect of acquisitions. Gross Operating Profit (including store and manufacturing operating expenses but excluding General and Advertising expenses) already grew by 21.6% in the 3rd quarter of 2011, in line with revenue growth, compared with +6.2% in the first quarter and +9.2% in the second quarter", he stated.

JFC's General & Advertising Expenses, however, grew by 29.9%, thereby reducing Operating Income growth to 5.0%. For the first nine months of the year, these expenses increased by 17.7%. The significant increase was due to the inclusion of Mang Inasal's overhead that was acquired in November, 2010 and to the building of its China corporate organization and commissary.

"JFC had to make a major investment in building its organization capability in China, including its Global Research & Development Center in Shanghai and the Jollibee Foods Processing Center in Anhui Province to support its long term growth there. We look forward to improving our worldwide overhead and
