Fastfood and casual dining has grown popular with the masses, quickly becoming an indispensible part of our urban environment. Likewise, in our society greatly influenced by popular culture, Pop Art has received interest with its fun and vibrant manifestations of our curiosities and activities; making it a perfect fit in presenting our accomplishments across brands and products.
WE REMAIN FOCUSED ON ACHIEVING OUR GOALS, STRIVING TO MEET EVOLVING MARKET DEMANDS AND SEEKING WAYS TO IMPROVE PERFORMANCE WHILE HELPING OUR COMMUNITIES.
CHAIRMAN’S MESSAGE

TO MY FELLOW STOCKHOLDERS,

While 2015 was particularly challenging for Jollibee Foods Corporation, we made clear progress on a number of strategic fronts that will strengthen our core businesses and drive both near- and long-term value of our customers and shareholders.

We continued to expand our brands and business presence across various geographies, through organic growth and acquisitions in order to accelerate growth and profitability.

In 2015, we opened 306 stores worldwide, the highest number of store openings in a single year in JFC’s history.

Through Bee Good!, JFC’s wholly-owned subsidiary, we completed the acquisition from Smashburger Master LLC of 40% of the outstanding units of SJBF LLC, the Parent Company of the entities comprising the Smashburger business. Smashburger is a leading fast casual “better burger” restaurant known for its fresh, never frozen 100% Certified Angus Beef® with over 350 restaurants worldwide in 35 states in the US and 7 foreign markets. This acquisition will make JFC’s presence in the US more significant, as it goes beyond the Filipino market by serving mainstream consumers in the US$100 billion US burger market, a food segment which is estimated to be almost three times larger than pizza, sandwich or coffee in terms of sales. This acquisition will also make the US one of JFC’s most important markets and drivers of long term growth along with the Philippines, China and the Filipino markets abroad.

During the year, we also made significant progress in our corporate social responsibility initiatives through the Jollibee Group Foundation (JGF). The Busog, Lusog, Talino (BLT) School Feeding Program has covered more than 1,560 schools in 200 towns and cities across the country reaching more than 165,000 pupils since the program started in 2007.

JGF has taken a new direction in BLT in light of the Department of Education’s initiative to fully fund its School–Based Feeding Program for all under-nourished public elementary school children. The Foundation will continue to support DepEd’s efforts by launching two major initiatives: the BLT Excellence Awards and the BLT School Feeding Kitchen. The Excellence Awards encourages schools to adopt food safety and cleanliness standards in implementing school feeding program. The BLT Kitchen operates like a commissary and centralizes food preparation, hence serving more children with less time and effort on the part of the school.

Through the Farmer Entrepreneurship Program (FEP), 12 farmer groups delivered various vegetables to JFC in 2015, reaching a combined total of 950 metric tons which is equivalent to one-fourth of the company’s vegetable requirements. Total deliveries of farmer groups for the year amounted to more than Php43 million.

FEP continues to be a model for inclusive business and was cited as an example in setting up DTI’s Negosyo Center by the Office of Senator Bam Aquino. FEP was also presented in other fora both here and abroad.

At the APEC Small and Medium Enterprises Summit 2015, President Benigno S. Aquino III cited the FEP for enabling small farms to sell produce directly to institutional markets.

Looking ahead, JFC is well positioned to continue growing. We remain focused on achieving our goals, striving to meet evolving market demands and seeking ways to improve performance while helping our communities. We intend to aggressively pursue acquisitions and organic growth programs around our core businesses in order to accelerate growth and profitability.

On behalf of the Board of Directors, I would like to thank our management team and employees worldwide for their dedication and commitment in driving the company forward. I would also like to express my gratitude to our franchisees, suppliers and other business partners for their invaluable contribution and steadfast support. And finally, thank you, our customers and shareholders, for your confidence in us, which helps fuel the momentum towards attainment of our goal of becoming one of the top 5 restaurants in the world in terms of market capitalization. We look forward to your continued support.

TONY TAN CAKTIONG
Chairman of the Board
OUR STRONG BRAND PORTFOLIO AND DISCIPLINED EXECUTION HAVE ALLOWED OUR DOMESTIC BUSINESS TO EXPERIENCE GOOD GROWTH.
CEO’S MESSAGE

TO MY FELLOW STOCKHOLDERS,

On behalf of the Board, I am pleased to present to you Jollibee Foods Corporation’s (JFC) Annual Report for the year ended December 31, 2015.

Our Company faced considerable challenges in 2015, but was able to leverage on its solid fundamentals and resilient nature to deliver growth in 2015. System wide sales, a measure of all sales to consumers both from company-owned and franchised stores rose by 10.9% in 2015 to PhP130.7 billion compared with sales in 2014. Our worldwide store network in 2015 was 7.0% higher than a year ago. Combined with our worldwide same store sales growth of 6% to 7%, our business is experiencing the highest organic growth in many years!

The Jollibee Group opened a total of 306 stores in 2015, of which 249 are in the Philippines, 39 in the People’s Republic of China, 1 in the United States and 17 in Southeast Asia and the Middle East, for a total of 57 new stores in foreign operations. This is the highest store opening in a single year in JFC’s history. The JFC Group had 205 more stores worldwide versus a year ago. Including new stores from 50% joint ventures – Highlands Coffee +31 and Pho 24 +3, mostly in Vietnam; 12 Hotpot +2, in China and from the acquisition of a 40% stake in Smashburger with 352 outlets, mostly in the United States, the JFC Group would have added 565 stores in 2015 for a total of 3,636 stores, a growth of 18.4% over a comparable number of outlets a year ago.

Our new stores performed well, particularly those in the Philippines, exceeding their target sales and return on investments. These are marks of the strong health of the brands and of JFC’s increased organization capability.

Our strong brand portfolio and disciplined execution have allowed our domestic business to experience good growth, with some brands doing exceptionally well.

• 2015 was challenging for the Jollibee brand, particularly in the first half of the year, arising largely from pricing concerns and pressure from competition. Amidst these challenges, Jollibee was able to recover in the second half and continue with its growth path ending the year with a high single-digit growth in system wide sales. During the year, 67 new stores were opened, the highest in Jollibee’s history.

• Chowking delivered solid revenue and operating profit growth through systemic improvement, focus on elevating the brand, growing its flagship products and achieving excellence in the restaurants.

OUR COMPANY MADE SIGNIFICANT INVESTMENTS NECESSARY TO STRENGTHEN OUR CORE BUSINESSES AND DRIVE BOTH NEAR AND LONG-TERM VALUE FOR OUR CUSTOMERS AND SHAREHOLDERS.
• 2015 was another record-breaking year for Burger King Philippines with 12 consecutive months of double-digit sales growth. This led to Burger King Philippines reaching no. 1 in rolling base sales growth within the JFC and the Burger King Asia-Pacific systems.

We have made a good progress on our international business. In 2015, our international business accounted for 22% of total revenues. Our largest international business, in China, delivered positive same store sales growth and continued to be profitable even as it faced weak economic conditions. Our US business grew well ahead of the fast food market in the country with strong same store sales and profit growth. Our businesses in Southeast Asia and the Middle East saw strong sales growth in 2015 driven by our Jollibee business in Vietnam and new Middle East markets in the United Arab Emirates and Bahrain.

During the year, our Company made significant investments necessary to strengthen our core businesses and drive both near and long-term value for our customers and shareholders. These investments were associated with our information technology upgrade, the increase in our network development organization, the acquisition of Smashburger and the extra supply chain and logistics costs needed to support our business in the Philippines that has been growing faster than we anticipated. These costs adversely affected JFC’s net income attributable to equity holders of the Parent Company which declined by 8.1% compared to 2014 while Earnings per share declined by 9.0%.

JFC’s net cash position improved significantly, from Php0.6 billion in December 2014 to Php2.4 billion in December 2015 despite the acquisition of 40% of Smashburger for US$100.3 million (or Php4.7 billion) in October 2015, primarily due to reduction in working capital level.

• Greenwich continued to post double-digit growth in system wide sales and built 27 new stores, its most number of new stores in 10 years. All new stores sported Greenwich’s new pizzeria design concept.

• Red Ribbon continued with its nationwide expansion by opening 69 new stores, 10 of which in new towns and cities. It also renovated 39 stores, the highest number in the brand’s history. All these helped Red Ribbon achieve a double-digit growth in system wide sales.

• Mang Inasal had another exceptional year with impressive system wide and rolling base sales and profit growth driven by strong volume across the country.
We continued our commitment to deliver value to shareholders by returning Php1.77 per share or a total of Php1.9 billion in cash dividends, representing a dividend payout of 38.3%. The JFC stock price grew by 1.9% in 2015 compared to the Philippine Stock Exchange Index which declined by 3.9%. JFC’s stock price to earnings ratio rose to 47.4 times.

We continue to have great confidence in the long-term success of JFC. We believe that with our clear strategic focus and top-notch and dedicated teams, we will continue to deliver industry-leading results in the future.

I would like to thank our Board of Directors for their insights, guidance and encouragement through the years. We owe our success to all our employees, our global management teams and leaders for their dedication and commitment in driving JFC forward. My deep appreciation to each of you.

I would also like to thank our business partners, franchisees and their employees for their efforts and support. To all our stakeholders, for their continued interest and faith in JFC, a special thank you. We look forward to your continued partnership and support.

ERNESTO TANMANTIONG
Chief Executive Officer
CHICKENJOY will always be my favorite!
2015 tested Jollibee’s mettle as the year was full of challenges characterized largely by pricing concerns and extra pressure from competition. With the company’s strong resolve to get back on track anchored on a solid battle plan and sustained marketing efforts, Jollibee was able to recover and continue with its growth path that resulted in a fairly high single-digit sales growth by the end of the year.

As part of the brand’s strategic plan, Jollibee focused on its flagship Chickenjoy products, bundling them with Jolly Spaghetti and introduced a whole Chickenjoy Affordelicious line-up.

Back to back campaigns for Chickenjoy took place in the coming months. One reinforced Chickenjoy’s long-standing love affairs with Filipinos followed by video testimonials of people from the #Chickenjoy Nation. Jollibee then tugged the hearts of families via its ‘Made of joy na walang katulad’ campaign.

Jollibee relaunched the Garlic Pepper Beef with Pinoy rockstar icon Bamboo as endorser, highlighting the product’s good value for money proposition.

A new thematic campaign was also launched for the Cheesy Bacon Mushroom Yum with the country’s top loveteam, James Reid and Nadine Lustre. This was followed by a campaign for Jollibee Spaghetti, headlined by popular child actor Marco Masa.

In time for lent, Jollibee brought back tune pie and offered a trio pack for takeout. Other product innovations included the Peach mango sundae, Glazed Chickenjoy and Reeses Mix-ins.

The Taste Forever Love campaign for Jollibee’s Burger Steak was anchored on the insight of fad vs forever featuring Reid and Lustre. Jollibee treated fans to a Taste Forever Love concert last December to share with them the campaign’s huge success.

To drive brand love, Jollibee revived the iconic “I love you Sabado!” jingle for its weekend thematic campaign, produced made-for digital materials for special family occasions and mounted a big consumer event, the Jollitown Funtasy Land in Manila and Davao. It launched the new Jollibee Kids Meal packaging – the Jolly Joy Box – that was well-received by customers and also did a strategic collaboration with Uniqlo for specially-designed Jollibee apparel.

2015 marked the 5th year of the Jollibee Family Values Awards, the brand’s recognition program for Filipino families who have exhibited good deeds for the benefit of their communities.

The company also celebrated a major milestone with the opening of its 900th store located in Palo, Leyte. Using ‘900 Reasons to Smile’ as a handle, Jollibee dedicated the opening of the store to the residents of Palo who have weathered the strongest of storms in 2013 and showed resilience as they carried on to rebuild their lives. Jollibee ended 2015 with a total of 916 stores, all spreading joy to many Filipino families across the archipelago.
THE TASTIEST, MEATIEST JOLLY SPAGHETTI!
SOARING HIGHER IN 2015

2015 was another landmark year for Jollibee International operations with unprecedented growth not just in sales but also in international expansion. Jollibee system wide sales grew in double-digits in 2015, which was largely driven by historic growth from the US and Vietnam businesses. Cementing its status as a truly global brand, Jollibee continues its international expansion with 16 new stores opened, actually celebrating its 1000th store opening in the United Arab Emirates (UAE) which marks the first entry of the brand into Dubai, a key market in the Middle East.

Jollibee USA had a historic year in 2015 in terms of revenue hitting over Php3 billion for the first time. Jollibee continues to defy industry trends with system wide sales growing in high teens and same store sales in high single-digits over last year. A key factor to Jollibee’s success was the continued focus on strengthening the flagship products of Chickenjoy and Jolly Spaghetti. These helped drive the growth of the US business, with both products accounting for a significant share of total sales.

Jollibee Vietnam continues to be a strong performing market with remarkable growth in system wide sales and 12 new opened stores for 2015, highest among all international markets, due to strong focus on its Flagship products. Our biggest non-Filipino market continues to impress, now with an even bigger share of the QSR segment.

Jollibee Brunei’s growth in 2015 continued through a wider store network and a strong following for its core menu offerings. It is poised to aggressively grow further with the opening of the very first right hand drive-through store that will take advantage of the high volume of vehicles in Brunei.

In Singapore, Jollibee continues its steady growth in system wide sales as both its stores continue to do well with continued strong patronage by both Filipinos and locals. Jollibee ends 2015 with a strong outlook in Singapore, looking to expand with 2 new store openings this January 2016 in new retail trade areas as more and more locals patronize the brand.

In the Middle East, Jollibee is continuing its aggressive growth and expansion. With its entry in two new countries – Bahrain and the UAE – and double-digit growth in system wide sales, Jollibee demonstrates that there is much untapped market potential yet to be maximized.

Jollibee’s entry in the UAE made its mark in 2015 with one of the highest opening week sales yet. Entering through The Dubai Mall – the world’s 2nd largest mall and a prime location for tourists and locals – Jollibee sustained stellar performance throughout the year beating targets by 10% and has already confirmed multiple store sites for its 2016 expansion.

In Bahrain, Jollibee continues to enjoy strong patronage from Filipinos but has also been showing growth in sales from markets of different nationalities.

Jollibee Kuwait responded to the rise in demand last May 2015 through the opening of its 4th store in Marina Mall.

Jollibee Kingdom of Saudi Arabia and Qatar have been sustaining their growing positions in their respective markets through the maximization of business channels and maximization of product promotions and strategic product launches.

Jollibee is well-poised with truly great tasting and loved flagship products, and a steady expansion plan across different global markets inching towards the goal of bringing the joy of eating truly delicious food to everyone.
OUR
OVERLOADED
FAVORITE!

ULTIMATE OVERLOAD PIZZA
Despite the fierce competition in the pizza and pasta industry, Greenwich continued its year-on-year double-digit growth in its 2015 annual system wide sales. Its continued nationwide store expansion, strengthening and broadening its menu offerings, and launching creative campaigns were the major drivers of this growth.

Greenwich built 27 new stores last 2015; its most number of new stores in over 10 years, bringing the overall number of branches to 231. All of these stores follow the new pizzeria design concept which combines mid-century-inspired wood panels, brick accents, and other rustic motifs with modern, industrial stylings. The design gives the stores a hip and quirky look that the youth find Instagram-worthy, making barkada moments extra memorable.

New offerings like the Choco Banana Crisp dessert pizza, Wacky Wings, and Very Cheesy Macaroni were added to the menu to go well with Greenwich's best-tasting pizzas and pastas. The Overloaded Supreme Meal (featuring the best-seller pizzas & Lasagna plus Wacky Wings) and Cheesy Steak & Fries pizza provided customers with a hefty, high-value meal combination. The excitement brought about by these new products resulted in increased store visits and encouraged customers to add more to their usual orders.

2015 was also a banner year for Greenwich's Delivery business, with sales posting a high 20% growth catapulted by the launch of the improved DEALicous Duo 2-pizzas-for-499 promo and its Ultimate Green Card loyalty program.

Greenwich strengthened its affinity with its target market with the introduction of its new Barkada brand ambassadors composed of popular young celebrities Yassi Pressman, Andrei Paras, Jerome Ponce and Robi Domingo. The new Barkada was featured in campaigns for Ultimate Overload, Crispy Thins, the limited-time-offer Cheesy Steak and Fries pizza and Lasagna Supreme resulting in these products' combined average sales growth of 18% to 33%.

Another milestone for the brand was the launch of The #UltimateBandkada Search. Music is one of the main interests of Greenwich's young target market; and so to tighten its connection and relevance among this segment, The #UltimateBandkada Search was launched to discover the next big young band act whose edge is to combine different music genres in their music. Its first ever winner, the B-Boys, won an exclusive recording contract with Viva Records and has been touring various events together with other well-known and established bands. This could be described as Greenwich's biggest PR-led initiative, the success of which enabled the brand to win the Public Relations Society of the Philippines' prestigious gold Anvil award for its special events category.
CHINESE-STYLE FRIED CHICKEN

SUPERB AND RICH IN TASTE!
The Chowking Philippines business thrived in a very competitive environment in 2015. The business continuously made systemic improvements in its execution capability. This, coupled with the discipline to focus on its three key priorities: to elevate the brand, grow its flagship products and achieve excellence in the restaurant; delivered profitable growth across the country.

To elevate the brand, Chowking enticed Filipinos with appetizing advertising of flagship products and reassured them of their great value. Further, it connected with guests through nationwide product sampling activities that were both entertaining and educational about Chinese food. All these were amplified on social media to drive the brand’s relevance.

Chowking’s flagship products sharpened the brand’s Chinese positioning in a cluttered QSR market. 2015 was a banner year for Pork Chao Fan, Chunky Asado Siopao and Lauriat—delicious Chinese specials found only in Chowking. The commitment to serve hot and tasty Chinese food was championed by leaders in the commissaries all the way to every store, everyday.

Chowking focused on achieving excellence in all restaurants beginning with their well-placed locations. New markets were penetrated by new stores while current markets were served better by renovated stores. Chowking opened 45 new stores ending the year with a store network of 439. Standards on food, service and cleanliness remain at the center of every store operations team—all enablers for dining experiences that truly WOW the guests.

2015 was a Step Up in the right direction for Chowking! In 2016, it will remain committed to wow guests with Chowking Sarap moments every day, everywhere!
SO GOOD, SO FILLING REALLY CHUNKY!
2015 was a big year for Chowking International Operations. Strategies were in place, plans were put into action and results were delivered ending the year with double-digit growth in system wide sales and a total of 46 stores in the United States of America (USA) and the Middle East.

In the United States, focused efforts on building flagship products were key to Chowking’s success. The brand started the year with an above-the-line campaign featuring Chinese-style Fried Chicken, endorsed by Kris Aquino. Highlighting Chinese-style Fried Chicken as the fried chicken made with real Chinese spices, the campaign generated strong growth in Average Daily Quantity versus previous year’s volume.

Chowking USA also launched the improved profile of Chunky Asado Siopao, with chunkier and meatier asado filling. Chunky Asado Siopao drove the strong growth in the total dimsum category.

In line with the strategy to develop superior tasting and craveable products, Chowking USA introduced new products to solidify the brand’s position as a Filipino-inspired Chinese QSR. Sweet and Sour Pork, Meaty Wonton Noodles and Milk Tea were the perfect addition to strengthen the brand’s menu line-up.

Chowking USA also improved its menu board with the introduction of a new design and installation of digital LED menu boards in its stores. The new digital menu board provides better store experience and appetizing product presentation that helped solidify the brand’s image in the QSR market.

In line with its commitment to care for the environment, Chowking launched its paper packaging with the new Chinese-themed look.

2015 was also an eventful year for Chowking Middle East as it won the Filipino Times Award for “The Preferred Fast Food Restaurant” in the United Arab Emirates.

Chowking Middle East ended the year with 27 restaurants that are strongly positioned in key cities in the United Arab Emirates (20), Qatar (4), Oman (2) and Kuwait (1). An aggressive store expansion plan is in place as the brand prepares to enter Kingdom of Saudi Arabia, the biggest economy in the Gulf Cooperation Council (GCC). Chowking Middle East will also strengthen its presence in Kuwait, Oman and Qatar. 2016 will witness the highest ever store opening for Chowking in the Middle East markets. To further enhance guests’ store experience, Chowking Middle East will introduce the most recent restaurant design concept in select locations.

With a clear strategic focus, Chowking International Operations is poised for growth and well-positioned to face the challenges ahead.
ALWAYS DELICIOUS!

TOMATO BEEF
2015 witnessed a new milestone for Yonghe King as it turned 20. The year also marked Yonghe King’s 5th year as the Number 1 brand in the China Brand Power Index (C-BPI) survey 2015. Yonghe King was among the Five-Year Champions recognized as 2015-C-BPI “Golden brands” in the service industry. This award mirrors Yonghe King's success in winning the consumer trust and satisfying the fast-changing Chinese market demands.

To celebrate its 20th year, Yonghe King introduced a new brand slogan: “Excellent taste through hard work” and launched several initiatives with the ultimate goal of providing its customers with excellent-tasting products and exceptional dining experience to satisfy the evolving needs and taste of Yonghe King’s customers. A new product, Crispy Tender Chicken Thigh was developed and piloted in selected stores during the year with successful results, matching the sales volume of Yonghe King’s bestseller Minced Pork Rice. Yonghe King also further improved its flagship and core products, the Tomato Beef Noodle Soup and the Braised Beef Noodle Soup with the use of premium cuts of steak. All these efforts reflected Yonghe King’s commitment to use only the highest quality of food ingredients for excellent product taste, and disproved the fast food notion of compromising quality for speed.

Yonghe King opened 27 stores in 2015. Two newly-opened stores in Shanghai sported a new store design that brings Yonghe King back to its roots as a Taiwanese brand and features a theme inspired by Taiwan’s famous street food. They will serve as Yonghe King’s pilot stores for testing new ideas and systems as it seeks innovative ways to improve customer service, systems and processes and increase sales and profit. The ‘Just-in-time’ production system was implemented in these two stores to deliver always freshly prepared food, replacing the fast service and ready-to-serve-food model used by other stores. Menu items that did not fit this new system were taken out. A new digital menu board and mobile payment system are also being tested in these two stores, among a number of modernizing initiatives to ensure the brand stays current and appeals to a new generation of customers.

All these efforts led to Yonghe King achieving remarkable improvement on its ‘Food Taste and Value for Money’ scores and maintaining healthy profit for 2015.

Looking forward to 2016, Yonghe King will focus even more on the ‘basics’ of its success: excellent tasting food, good value-for-money, fast & friendly service and beautiful & clean stores. This gives Yonghe King confidence to deliver sustainable, profitable growth.
MOM,
YOU ONLY DESERVE
THE BEST!

BLACK FOREST
Red Ribbon set another record year by successfully delivering a solid double-digit system wide sales growth in 2015. The growth was largely driven by the opening of 69 new stores, 10 of which in new towns and cities, resulting in all districts breaching the P1 billion sales mark for the year. Aside from new stores, the launch of new products, like Limited Time Offer Cakes and Mamon, Double Deck Cake, Cake Slices, Cookies & Cream Mamon, Premium and Double Deck Dedication Cake, also raked in remarkable sales, significantly contributing to the growth of the brand particularly in the Rounds and Square Cakes categories which both grew by double-digit. This achievement marked Red Ribbon’s commitment to making moments even sweeter for Filipino families with its wider store network and a richer range of products.

2015 also saw the highest number of renovated stores in the history of the brand. A total of 39 stores were renovated to project a refreshed look. In addition, a new store concept was piloted in Market Market and Trinoma. The new store concept provides a contemporary feel and an experience for customers to enjoy the brand’s wide product offerings that complement both their special and every day celebrations.

With the successful pilot study, the new store concept will be rolled out system wide soon. While keeping its focus on Food, Safety, Cleanliness and Condition (FSC) of its stores, Red Ribbon also invested in developing and rolling out its own brand of customer service to all its stores nationwide. The program, aimed at making each customer visit memorable and endearing, is in line with the brand’s vision to be the most loved bakeshop brand in the country.

The commissary likewise saw tremendous activity in 2015, aimed at expanding capacity to serve the ever growing number of stores. Numerous projects to improve costs and efficiency in the production line were undertaken. The commissary also stepped up efforts to enhance product quality. All these initiatives served the brand well as evidenced by significant reduction in rejects and variances.

To cap off the year, Red Ribbon finished with strong double-digit growth during the peak periods of Christmas and New Year, proving once again that no celebration is complete without a Red Ribbon product. With the continued drive for product, store, and commissary innovations, Red Ribbon is well poised for further growth in 2016.
LOOKS AMAZING!
CAN'T WAIT TO TAKE A BITE!

MANGO SUPREME
Red Ribbon continued to delight customers and make sweet memories in the United States of America (USA).

2015 was a memorable year for Red Ribbon. It was marked by a major improvement on its flagship Mango Cake. Customers craved real mangoes so Red Ribbon filled its cake with more real mangoes, added mango glaze on the cake’s layers and redesigned it. Customers now see and taste more real mangoes than ever in the new Mango Supreme Cake! Red Ribbon’s advertising campaign for the new Mango Supreme cake generated a 9% increase in volume versus same period last year. Red Ribbon also revived its signature cake, the Chocolate Mousse. This delighted the brand’s loyal customers and generated incremental volume for the business.

Advertising campaigns were launched to help establish Red Ribbon as an everyday brand. A new TV commercial was aired to communicate its flagship pastry, Butter Mamon as “Butter Moist, Not Dry”, generating an 8% increase in sales volume. The Cheesy Ensaymada campaign featured the ensaymada as “Perfectly Cheesy, Perfectly Sweet”, resulting in a 15% increase in volume.

In Hawaii, Red Ribbon acquired Mauna Kea, a local bakery to help build commissary operational efficiency. Mauna Kea produced new breads, Taro Roll & Guava Roll to cater to the Hawaiian market.

The invaluable effort and dedication of the store team was instrumental for the success of Red Ribbon in 2015. The stores garnered a rating of 88% in Food Service and Cleanliness certification, of which 73% received a gold rating. System wide sales grew mid-single-digits with 32 stores as of December 2015. Stores in New York, New Jersey, Las Vegas & California were renovated to update the store look and deliver a more memorable customer experience.

These efforts made Red Ribbon the undisputed champion of cakes and pastries in the hearts of Filipino-Americans in the United States. Red Ribbon is committed to make more memorable, sweet family moments by delivering high-quality products with excellent customer service. Red Ribbon is geared to continue to grow and solidify its name in the bakeshop market in the United States in the years to come.

ANNUAL REPORT 2015
LEAN PORK & PRESERVED CONGEE

ALWAYS TASTY AND FILLING!
The winning streak continued as Hong Zhuang Yuan registered its biggest year yet in 2015. System wide sales and rolling base sales grew in double-digits, the highest in seven years! Sales performance was driven by a strong leap in transaction count and average check, a reflection that more customers experienced and enjoyed the brand.

Hong Zhuang Yuan’s outstanding sales translated to a strong profit growth, ahead of its target for the year. This was achieved as the brand strengthened its brand position of being the only Chinese neighborhood restaurant that “feels like home,” offering delicious, everyday good value for money “comfort food” and bringing delightful, comfortable eating experience.

Hong Zhuang Yuan optimized its menu by introducing new products that became popular and were widely accepted by the customers. These new products generated incremental sales for the business. At the same time, Hong Zhuang Yuan also continued to grow its iconic products, such as Lean Pork & Preserved Egg Congee, Five Black Congee, Kungbao Chicken, Sautéed Assorted Vegetable served with Pancake.

To ensure consistent high quality food in all of its restaurants every day, an end-to-end approach was undertaken.

Hong Zhuang Yuan also implemented supply chain improvement programs in 2015 to meet the increase in demand. Its newly-renovated commissary that has more modern and efficient facilities started operations in mid-2015. It also implemented safety and sanitation work gear, work safety program and conducted good manufacturing practices (GMP) training programs during the year that resulted in sustained commissary profitability and improved GMP scores.

Hong Zhuang Yuan continued to renovate existing restaurants that enhanced customer visits and dining experience. These were prominently displayed in the restaurant interiors, creating an Old Beijing atmosphere that is modern and welcoming.

With the momentum of 2015, Hong Zhuang Yuan is more ready to reach bigger goals in 2016 as it maintains its unique identity and consistently deliver great value to its customers.
NUOT SA SARAP!

CHICKEN INASAL
From its first store in Robinson’s Iloilo 12 years ago, Mang Inasal has established itself as a strong national brand and a leader in the quick-service restaurant industry through fortifying the strength of its products, people, and processes.

In 2015, Mang Inasal remained the number one Pinoy quick service restaurant and Chicken Inasal the number one Grilled Chicken (source: 2015 Kantar Panel Metro Manila). These accolades are a result of Mang Inasal’s great-tasting product offerings and serving Gold Standard Chicken Inasal across its 460 stores.

The company introduced improvements into its well-loved products such as Bangus Sisig, Bangus Inihaw, and the limited time offer Pinoy Halo-Halo with Christmas Barquillos. Customers across the country recognized the consistently excellent quality of Mang Inasal bestsellers such as Chicken Inasal, Pinoy Halo-Halo, Pork BBQ, and Palabok.

These products are highlighted by successful multi-channel campaigns including Chicken Inasal’s “2-in-1 sa Laki, Nuot sa Ihaw Sarap,” Palabok’s “Sa Sauce at Sangkap, Ohh Sarap,” and “Pinoy Sangkap, Creamy Sarap” for Pinoy Halo-Halo.

The skillful combination of product innovations and strategic marketing campaigns also translated into impressive growth for average daily quantity (ADQ) for three key products — Noodles (Pansit Bihon and Palabok), Pinoy Halo-Halo and Crema de Leche Halo-Halo, and Chicken Inasal.

2015 brought across-the-board growth to Mang Inasal. The strength of the company’s people is reinforced with the completion of Operations and Support Group Managers. Seventy-five percent of Mang Inasal stores now have a staff of three managers.

Through the Assistant Restaurant Management Training Program, the company trained 447 new managers. Mang Inasal also enlisted six potential officers to the JFC Emerging Leaders Program and eight promising managers to the JFC University. All these training programs complement Mang Inasal’s employee engagement initiatives, and enabled the company to post a record-high Employee Engagement Score of 82%.

Mang Inasal’s topnotch commissary standards were affirmed with the awarding of Hazard Analysis Critical Control Point (HACCP) Compliance Certificate for all of its three commissary locations. The company posted 78% FSC Stars, a reflection of its commitment to the highest quality of food, service, and cleanliness in all locations.

Mang Inasal finished 2015 on a high note with system wide and rolling base sales growing in the high teens, 28 new stores and 60 newly-renovated stores.

Mang Inasal marked another milestone as it bagged the Most Outstanding Filipino Franchise under the Food Category – Large Scale in the 2015 Franchise Excellence Awards. Mang Inasal’s strong digital presence and engaging digital marketing campaigns garnered the company the distinction of ‘Most Positively Talked About Fast Food’ in 2015.

As 2016 unfolds, Mang Inasal remains committed to constant innovation to ensure the consistent delivery of the best products and best service: the Filipino customer.
FLAME-GRILLED, EXTRA BEEFY!
In 2015, focus, discipline, and excellence in execution were the keys to achieving a record-breaking year for Burger King Philippines. The focus on reaching out to more customers through network expansion, promoting its flagship products, driving outstanding operations, and growing its people led to the brand’s success in all aspects of the business.

By the end of 2015, Burger King had opened thirteen (13) new restaurants, the highest number of openings within a year the brand has seen in recent history. Expansion in key cities persisted as Burger King opened more stores in Cebu, with the Cebu Cabahug branch achieving the highest first three day sales in Burger King history last February 2015. Burger King Lipa Uptown also opened with the highest one day sales when it opened in August.The year also celebrated the brand’s entry into new territories, namely, Nueva Ecija and Bacolod marking the beginning of Burger King’s aggressive advance to more areas in the North and in the South. By year end, the official store count is at fifty-six (56), the largest store network Burger King has ever had in the Philippines. Apart from the numerous openings, two (2) key outlets, Glorietta Cinema and Trinoma, were renovated to the delight of the guests. By the end of 2015, more than 80% of the store network now sport the latest “Garden Grill” concept bringing the “best burger experience” promise of the brand to life.

In 2015, Burger King deliberately focused on building the brand’s equity through its flagship products—the Whopper and 4-Cheese Whopper. These were promoted in strategic channels such as TV, digital, billboard and bus ads, and in-store merchandising; highlighting the taste superiority of Burger King’s flame-grilled burgers and great value-for-money; challenging the other burgers of competition. A long-time Burger King favorite, the X-tra Long Chicken Sandwich, also got a push via Digital efforts in Facebook and YouTube, augmenting the impact of the flagship campaigns. New products like the Chicken Nuggets, and exciting “limited-time only” offers such as the Rock It Fries, and the Angry Whopper gave variety to the menu and generated brand excitement. The brand’s value proposition was also reinforced with the quarterly King Deals Coupons during the second half of the year. All the Marketing campaigns led to Burger King Philippines being recognized as The Choice 2015 Awardee for Favorite Fast Food Burger by several foodies and bloggers. Burger King enjoyed a record-setting twelve (12) consecutive months of double-digit sales growth with ninety-five percent (95%) of the branches posting positive sales growth. This led to Burger King Philippines ranking number 1 in rolling base sales growth within the Jollibee Foods Corporation and Burger King Asia-Pacific systems.

With relentless focus on addressing key issues surfaced in GuestTrac, the proprietary Burger King tool in monitoring guest experience and feedback, the Philippine operations was able to achieve its highest Net Promoter Score to date. It ranks as No. 2 in Burger King Asia Pacific for its Restaurant Excellence Visit audit. Locally, Burger King ranks No. 1 in Quality-Service-Cleanliness (QSC) Performance in the Jollibee Foods Corporation. Burger King Philippines’ world-class operations has become the benchmark in QSC for both its regional and local counterparts.
GREAT TASTE WITH THE BEST VALUE!

SPIRAL SNAIL RICE NOODLE
San Pin Wang rode 2015 with a record-breaking increase in profit. Comparative sales grew in high single-digits, the highest growth since the joint venture with Jollibee Foods Corporation started. About 20 million customers were served by the brand, which was 2/5 of Guangxi’s entire population.

The issue of food security was quite prevalent in China in 2015. This led to the rapid reformation and updating of San Pin Wang’s food processes and equipment to ensure food safety in the food served to customers. In 2015, San Pin Wang started with the renovation of its food processing plant and upgrade of its equipment. San Pin Wang also put stringent steps to ensure the improvement of its QSC (Quality, Service, Cleanliness and Value) in all aspects.

A milestone was also achieved as San Pin Wang had its first store that generated an annual turnover of over 10 million RMB. 2015 provided San Pin Wang the opportunity to open 10 stores – 3 company-owned stores and 7 franchised stores – bringing the total store count to 59.

The brand introduced two new products during the year - the Niusanbao and Tomato Beef Rice Noodle - to meet the changing demands of customers. The Kitchen Display System (KDS), electronic queuing device, self-service beverage and other new models were introduced in the stores to serve customers better and quickly. The online takeaway business was also launched this year to attract more customers.

On the people front, San Pin Wang implemented salary hikes as a recognition for the efforts and commitment of employees to drive sales and improve profit.

In 2016, San Pin Wang will continue upgrading its central processing plant and implementing more safety procedures to ensure quality in all of its food and services. San Pin Wang will also start developing the franchise business model to expand the brand’s presence in the region. All these will help lay a more solid foundation in the years to come.
I am a happy JFC vegetable supplier!

Thank you! Now, we are well-fed, healthy and smart!
After celebrating its first ten years, Jollibee Group Foundation (JGF) continued to work with partners and stakeholders to develop and implement programs that harness the strengths of Jollibee Foods Corporation as a food service company, creating lasting impact in the community.

Over the years, JGF’s flagship programs have evolved to become program models for addressing the country’s most pressing social challenges.

**Busog, Lusog, Talino (BLT) School Feeding Program**

Since the program started in 2007, BLT has covered more than 1,500 schools in 200 towns and cities across the country reaching more than 165,000 pupils. Year-on-year, 85% of pupils reach normal weight after completing the feeding cycle.

In 2015, in addition to regular school feeding activities, JGF undertook two major initiatives in support of the Department of Education’s (DepEd) nationwide implementation of its School-Based Feeding Program: the BLT Excellence Awards and the BLT School Feeding Kitchen.

The BLT Excellence Awards encouraged schools to adopt food safety and cleanliness standards in implementing school feeding programs. Agboy Elementary School in Iloilo was named as its first Grand Winner owing to its efforts to exceed the BLT standards, and its innovative approaches to working with the community to sustain the program.

JGF piloted the BLT Kitchen in Capas, Tarlac and also helped develop standards on food production, safety and cleanliness in a commissary kitchen set up. The initiative ensured that safe and quality food were prepared for undernourished pupils with less time and effort on the part of the schools. The BLT Kitchen in Capas served more than 600 pupils in five public schools in four hours each day. Following the success of this pilot initiative, JGF is promoting the establishment of these kitchen facilities across the country. To support this, DepEd has released a memorandum to all school divisions to work with JGF in the establishment of BLT Kitchens.

**Farmer Entrepreneurship Program (FEP)**

During the year, 12 farmer groups delivered white onions, salad tomatoes, green bell peppers, hot peppers, calamansi, cabbage, Baguio beans, sayote, chinese cabbage (pechay) and carrots to JFC. This reached a combined total of 950 metric tons which is equivalent to one-fourth of the company’s vegetable requirements. Total deliveries of farmer total groups amounted to more than Php 43 million.

FEP continued to be a model for inclusive business and was cited as an example in setting up DTI’s Negosyo Center initiated by the Office of Sen. Bam Aquino. FEP was also presented in other fora such as the Livelihoods Asia Summit in India, Credit Suisse Philanthropy Forum, and the Roundtable on Inclusive Agribusiness in Southeast Asia held in Vietnam.

At the APEC Small and Medium Enterprises Summit 2015, President Benigno S. Aquino III cited the FEP for enabling small farms to sell produce directly to institutional markets.

INDEPENDENT AUDITORS’ REPORT

The Stockholders and the Board of Directors
Jollibee Foods Corporation

We have audited the accompanying consolidated financial statements of Jollibee Foods Corporation and its subsidiaries, which comprise the consolidated statements of financial position as at December 31, 2015 and 2014, and the consolidated statements of comprehensive income, statements of changes in equity and statements of cash flows for each of the three years in the period ended December 31, 2015, and a summary of significant accounting policies and other explanatory information.

Management’s Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Philippine Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Philippine Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Jollibee Foods Corporation and its subsidiaries as at December 31, 2015 and 2014, and their financial performance and their cash flows for each of the three years in the period ended December 31, 2015 in accordance with Philippine Financial Reporting Standards.

See accompanying Notes to Consolidated Financial Statements.
1. CORPORATE INFORMATION

Jollibee Foods Corporation (the Parent Company) was incorporated in the Philippines. The Parent Company and its subsidiaries (collectively referred to as “the Jollibee Group”) are involved primarily in the development, operation and franchising of quick service restaurants (QSR) under the trade names “Jollibee”, “Chowking”, “Greenwich”, “Red Ribbon”, “Yong He King”, “Hong Zhuang Yuan”, “Mang Inasal”, “Burger King”, “San Pin Wang”, “Highlands Coffee”, “Pho24”, “12 Hotpot”, “Dunkin’ Donuts” and “Smashburger”. The other activities of the Jollibee Group include manufacturing and property leasing in support of the quick service restaurant systems and other business activities (see Notes 2 and 5).

The common shares of the Parent Company were listed and have been traded in the Philippine Stock Exchange (PSE) beginning July 14, 1993.

The registered office address of the Parent Company is 10/F Jollibee Plaza Building, 10 F. Ortigas Jr. Ave., Ortigas Center, Pasig City.

The consolidated financial statements as at December 31, 2015 and 2014 and for each of the three years in the period ended December 31, 2015, were reviewed and recommended for approval by the Audit Committee as well as approved and authorized for issuance by the Board of Directors (BOD) on April 6, 2016.

2. BASIS OF PREPARATION, STATEMENT OF COMPLIANCE, CHANGES IN ACCOUNTING POLICIES AND BASIS OF CONSOLIDATION

Basis of Preparation

The consolidated financial statements of the Jollibee Group have been prepared on a historical cost basis, except for the derivative assets and liabilities and certain available-for-sale (AFS) financial assets, which are measured at fair value. The consolidated financial statements are presented in Philippine peso, which is the Parent Company’s functional and presentation currency.

Statement of Compliance

The accompanying consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following new PFRSs and amendments to existing PFRS which became effective on January 1, 2015:

- Amendments to PAS 19, Employee Benefits - Defined Benefit Plans: Employee Contributions

PAS 19 requires an entity to consider contributions from employees or third parties when accounting for defined benefit plans. Where the contributions are linked to service, they should be attributed to periods of service as a negative benefit. These amendments clarify that, if the amount of the contributions is independent of the number of years of service, an entity is permitted to recognize such contributions as a reduction in the service cost in the period in which the service is rendered, instead of allocating the contributions to the periods of service.

This amendment is not applicable to the Jollibee Group since defined benefit plans of the Jollibee Group do not require contributions from employees and third parties wherein employees or third parties.

Annual Improvements to PFRSs (2010-2012 Cycle)

The following Annual Improvements to PFRS (2010-2012 cycle) are effective for annual periods beginning on or after July 1, 2014 and are not expected to have material impact on the Jollibee Group’s consolidated financial statements. They include:

- PFRS 2, Share-based Payment - Definition of Vesting Condition

This improvement is applied prospectively and clarifies various issues relating to the definitions of performance and service conditions which are vesting conditions, including:

- A performance condition must contain a service condition
- A performance target must be met while the counterparty is rendering service
- A performance target may relate to the operations or activities of an entity, or to those of another entity in the same group
- A performance condition may be a market or non-market condition
- If the counterparty, regardless of the reason, ceases to provide service during the vesting period, the service condition is not satisfied.

While the Jollibee Group has stock options plans, the clarification mentioned above will not change the recognition and measurement of these stock option plans.

- PFRS 3, Business Combinations - Accounting for Contingent Consideration in a Business Combination

The amendment is applied prospectively and clarifies that all contingent consideration, arrangements classified as liabilities (or assets) arising from a business combination should be subsequently measured at fair value through profit and loss whether or not they fall within the scope of PFRS 39, Financial Instruments: Recognition and Measurement (or PFRS 9, Financial Instruments, if early adopted). The Jollibee Group is already compliant with this amendment since it currently measures contingent consideration from acquisitions at fair value through profit or loss.

- PFRS 8, Operating Segments - Aggregation of Operating Segments and Reconciliation of the Total of the Reportable Segments’ Assets to the Entity’s Assets

The amendments are applied retrospectively and clarify that:

- An entity must disclose the judgments made by management in applying the aggregation criteria in the standard, including a brief description of operating segments that have been aggregated and the economic characteristics (e.g., sales and gross margins) used to assess whether the segments are ‘similar’.
- The reconciliation of segment assets to total assets is only required to be disclosed if the reconciliation is reported to the chief operating decision maker, similar to the required disclosure for segment liabilities.
The Jollibee Group will adopt the following revised standards, interpretations and amendments when these become effective.

Effective January 1, 2016

- **PAS 1, Presentation of Financial Statements - Disclosure Initiative**
  
  The amendments in PAS 1 clarify, rather than significantly change, existing PAS 1 requirements. The amendments clarify:
  
  - The materiality requirements in PAS 1;
  
  - That specific line items in the statements of comprehensive income and the statements of financial position may be disaggregated;
  
  - That entities have flexibility as to the order in which they present the notes to financial statements; and
  
  - That the share of OCI of an associate and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss.

  Furthermore, the amendments clarify the requirements that apply when additional subtotals are presented in the statements of financial position and the statements of comprehensive income. These amendments are effective for annual periods beginning on or after January 1, 2016, with early adoption permitted. The Jollibee Group is currently assessing the impact of the amendments on the consolidated financial statements but does not currently expect significant changes as a result of the amendments.

- **PAS 16, Property, Plant and Equipment, and PAS 38, Intangible Assets - Clarifications of Acceptable Methods of Depreciation and Amortization**

  The amendments clarify the principle in PAS 16 and PAS 38 that revenue reflects a pattern of economic benefits that are generated from operating a business (of which the asset is part) rather than the economic benefits that are consumed through use of the asset. As a result, a revenue-based method cannot be used to depreciate property, plant and equipment and may only be used in very limited circumstances to amortize intangible assets. The amendments are effective prospectively for annual periods beginning on or after January 1, 2016, with early adoption permitted. These amendments are not expected to have any impact to the Jollibee Group given that the Jollibee Group has not used a revenue-based method to depreciate its non-current assets.

- **PAS 16, Property, Plant and Equipment, and PAS 41, Agriculture - Bearer Plants**

  The amendments change the accounting requirements for biological assets that meet the definition of bearer plants. Under the amendments, biological assets that meet the definition of bearer plants will no longer be within the scope of PAS 41. Instead, PAS 16 will apply. After initial recognition, bearer plants will be measured under PAS 16 at accumulated cost (before maturity) and using either the cost model or revaluation model (after maturity). The amendments also require that produce that grows on bearer plants will remain in the scope of PAS 41 measured at fair value less costs to sell. For government grants related to these assets, the government grant component should be presented in the statement of comprehensive income.
to bearer plants, PAS 20, Accounting for Government Grants and Disclosure of Government Assistance, will apply. The amendments are retrospectively effective for annual periods beginning on or after January 1, 2016, with early adoption permitted. These amendments are not expected to have any impact to the Jollibee Group as the Jollibee Group does not have any bearer plants.

- **PAS 27, Separate Financial Statements - Equity Method in Separate Financial Statements**
  
The amendments will allow entities to use the equity method to account for investments in subsidiaries, joint ventures and associate in their separate financial statements. Entities already applying PFRS and electing to change to the equity method in its separate financial statements will have to apply that change retrospectively. For first-time adopters of PFRS electing to use the equity method in its separate financial statements, they will be required to apply this method from the date of transition to PFRS. The amendments are effective for annual periods beginning on or after January 1, 2016, with early adoption permitted. These amendments will not have any impact on the Jollibee Group's consolidated financial statements.

- **PFRS 10, Consolidated Financial Statements and PAS 28, Investments in an Associate and Joint Ventures - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture**
  
  These amendments address the conflict between PFRS 10 and PAS 28 (2011) in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in PFRS 3, between an investor and its associate or joint venture is recognized in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture. These amendments must be applied prospectively and are effective for annual periods beginning on or after January 1, 2016 with early adoption permitted. These amendments are not expected to have significant impact to the Jollibee Group's consolidated financial statements.

- **PFRS 10, Consolidated Financial Statements, PFRS 12, Disclosure of Interests in Other Entities and PAS 28, Investments in an Associate and Joint Ventures - Investment Entities: Applying the Consolidation Exception**
  
  The amendments address issues that have arisen in applying the investment entities exception under PFRS 10. The amendments to PFRS 10 clarify that the exemption from presenting consolidated financial statements applies to a parent entity that is a subsidiary of an investment entity, when the investment entity measures all of its subsidiaries at fair value.

  Furthermore, the amendments of PFRS 10 clarify that only a subsidiary of an investment entity that is not an investment entity itself and that provides support services to the investment entity is consolidated. All other subsidiaries of an investment entity are measured at fair value. The amendments to PAS 28 allow the investor, when applying the equity method, to retain the fair value measurement applied by the investment entity associate or joint venture to its interests in subsidiaries.

These amendments must be applied retrospectively and are effective for annual periods beginning on or after January 1, 2016 with early adoption permitted. These amendments are not expected to have any impact on the Jollibee Group's consolidated financial statements.

- **PFRS 11, Joint Arrangements - Accounting for Acquisitions of Interests**
  
  The amendments to PFRS 11 require that a joint operator accounting for the acquisition of an interest in a joint operation, in which the activity of the joint operation constitutes a business must apply the relevant PFRS 3 principles for business combinations accounting. The amendments also clarify that a previously held interest in a joint operation is not remeasured on the acquisition of an additional interest in the same joint operation while joint control is retained. In addition, a scope exclusion has been added to PFRS 11 to specify that the amendments do not apply when the parties sharing joint control, including the reporting entity, are under common control of the same ultimate controlling party. The amendments apply to both the acquisition of the initial interest in a joint operation and the acquisition of any additional interests in the same joint operation and are prospectively effective for annual periods beginning on or after January 1, 2016, with early adoption permitted. These amendments are not expected to have any impact to the Jollibee Group.

- **PFRS 14, Regulatory Deferral Accounts**
  
  PFRS 14 is an optional standard that allows an entity, whose activities are subject to rate-regulation, to continue applying most of its existing accounting policies for regulatory deferral account balances upon its first-time adoption of PFRS. Entities that adopt PFRS 14 must present the regulatory deferral accounts as separate line items on the statement of financial position and present movements in these account balances as separate line items in the statement of profit or loss and other comprehensive income. The standard requires disclosures of the nature of, and risks associated with, the entity’s rate-regulation and the effects of that rate-regulation on its financial statements. PFRS 14 is effective for annual periods beginning on or after January 1, 2016. Since the Jollibee Group is an existing PFRS preparer, this standard would not apply.

- **Annual Improvements to PFRSs (2012-2014 Cycle)**
  
  The Annual Improvements to PFRSs (2012-2014 cycle) are effective for annual periods beginning on or after January 1, 2016. They include:

  - **PFRS 5, Non-current Assets Held for Sale and Discontinued Operations - Changes in Methods of Disposal**
    
    Assets (or disposal groups) are generally disposed of either through sale or distribution to owners. The amendment clarifies that changing from one of these disposal methods to the other would not be considered a new plan of disposal, rather it is a continuation of the original plan. There is, therefore, no interruption of the application of the requirements in PFRS 5. This amendment must be applied prospectively. This amendment is currently not applicable to the Jollibee Group since it has no non-current asset held for sale and discontinued operations.
PFRS 7, Financial Instruments: Disclosures - Servicing Contracts

PFRS 7 requires an entity to provide disclosures for any continuing involvement in a transferred asset that is derecognized in its entirety. The amendment clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. An entity must assess the nature of the fee and the arrangement against the guidance for continuing involvement in PFRS 7 in order to assess whether the disclosures are required. The assessment of which servicing contracts constitute continuing involvement must be done retrospectively. However, the required disclosures would not need to be provided for any period beginning before the annual period in which the entity first applies the amendments. This amendment is not applicable to the Jollibee Group, having no servicing contracts for its financial assets.

PFRS 7, Financial Instruments: Disclosure - Applicability of the Amendments to PFRS 7 to Condensed Interim Financial Statements

The amendment clarifies that the offsetting disclosure requirements do not apply to condensed interim financial statements, unless such disclosures provide a significant update to the information reported in the most recent annual report. This amendment must be applied retrospectively. These amendments are not expected to have significant impact for the Jollibee Group.

PAS 19, Employee Benefits - Regional Market Issue Regarding Discount Rate

The amendment clarifies that market depth of high quality corporate bonds is assessed based on the currency in which the obligation is denominated, rather than the country where the obligation is located. When there is no deep market for high quality corporate bonds in that currency, government bond rates must be used. Government bond rates are currently used to calculate the present value of the Group's defined benefit obligation due to the absence of a deep local market for high quality corporate bonds. This amendment must be applied retrospectively. The Jollibee Group is already compliant with the requirements of this amendments even before it became effective since government board rates are currently used to calculate the present value of the Group's defined benefit obligation due to the absence of a deep local market for high quality corporate bonds.

The amendment clarifies that the required interim disclosures must either be in the interim financial statements or incorporated by cross-reference between the interim financial statements and wherever they are included within the interim financial report (e.g., in the management commentary or risk report). The other information within the interim financial report must be available to users on the same terms as the interim financial statements and at the same time. This amendment must be applied retrospectively. The Jollibee Group is already in compliant with the requirements of this amendment.

Effective January 1, 2018

PFRS 9, Financial Instruments (2014 or Final Version)

In July 2014, the final version of PFRS 9, Financial Instruments, was issued. PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39, Financial Instruments: Recognition and Measurement, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. PFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. Retrospective application is required, but comparative information is not compulsory. Early application of previous versions of PFRS 9 is permitted if the date of initial application is before February 1, 2015. The Jollibee Group plans to adopt the new standard on the required effective date, which is subject to changes arising from a more detailed ongoing analysis.

Other than the potential changes on the accounting for the Jollibee Group’s AFs financial assets, the Jollibee Group does not expect any material change on its accounting for financial assets and financial liabilities. The Jollibee Group, however, expects potential changes in its impairment model as a ‘expected credit loss’ model replaces the ‘incurred credit losses’ model under PAS 39.

The Jollibee Group is currently assessing the impact of adopting this standard and expects that the adoption of PFRS 9 will have an effect on the classification and measurement of the Jollibee Group’s financial assets but will have no impact on the classification and measurement of the Jollibee Group’s financial liabilities.

The following new standard issued by the International Accounting Standards Board (IASB) has not yet been adopted by the Financial Reporting Standards Council

IFRS 15, Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The new revenue standard will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after January 1, 2018. Early adoption is permitted. The Jollibee Group is primarily engaged in the restaurant and franchising businesses. The Jollibee Group is currently assessing the potential impact on its consolidated financial statements resulting from the application of IFRS 15. Furthermore, the Jollibee Group is considering the clarifications issued by the IASB in an exposure draft in July 2015 and will monitor any further developments.

IFRS 16, Leases

In January 2016, the IASB issued IFRS 16, Leases, which requires lessees to recognize assets and liabilities for most leases. Lessees will have a single accounting model for all leases, with certain exemptions. For lessors, there is little change to the existing accounting in PAS 17, Leases.
THE NEW STANDARD WILL BE EFFECTIVE FOR ANNUAL PERIODS BEGINNING ON OR AFTER JANUARY 1, 2019.

The consolidation of a subsidiary begins when the Jollibee Group obtains control over the subsidiary and ceases when the Jollibee Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Jollibee Group gains control until the date the Jollibee Group ceases to control the subsidiary.

Profit or loss and each component of OCI are attributed to the equity holders of the Parent Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit. Wherever it is the lessee, the Jollibee Group will be required to recognize both a right to use asset and a lease liability to gross amounts.

**With Deferred Effective Date**

 Philippine Interpretation IFRIC 15, Agreements of Construction of Real Estate

This interpretation covers accounting for revenue and associated expenses by entities that undertake the construction of real estate directly or through subcontractors. The SEC and the FRSC have deferred the effective date until the final Revenue standard is issued by the IASB and an evaluation of the requirements of the final Revenue standard against the practices of the Philippine real estate industry is completed. Adoption of the interpretation when it becomes effective will not have any impact on the financial statements of the Jollibee Group as it is not into the business of construction of real estate.

**Basis of Consolidation**

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiaries as at December 31, 2015 and 2014 and for each of the three years in the period ended December 31, 2015.

Control is achieved when the Jollibee Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

There is a general presumption that a majority of voting rights results in control. To support this presumption and when the Jollibee Group has less than a majority of the voting or similar rights of an investee, the Jollibee Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; or
- The Jollibee Group's voting rights and potential voting rights.

The Jollibee Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Control of a subsidiary begins when the Jollibee Group obtains control over the subsidiary and ceases when the Jollibee Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Jollibee Group gains control until the date the Jollibee Group ceases to control the subsidiary.

Profit or loss and each component of OCI are attributed to the equity holders of the Parent Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Jollibee Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Jollibee Group are eliminated in full on consolidation. The reporting dates of the Parent Company and the associate or joint ventures are identical and the latter's accounting policies conform to those used by the Parent Company for like transactions and events in similar circumstances.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Jollibee Group loses control over a subsidiary, it:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- Derecognizes the carrying amount of any non-controlling interests;
- Derecognizes the cumulative translation differences recorded in equity;
- Recognizes the fair value of the consideration received;
- Recognizes the fair value of any investment retained;
- Recognizes any surplus or deficit in profit or loss; and
- Reclassifies the parent’s share of components previously recognized in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Jollibee Group had directly disposed of the related assets or liabilities.

Non-controlling interests represent the interests in the subsidiaries not held by the Parent Company, and are presented separately in the consolidated statement of income and within equity in the consolidated statement of financial position, separately from equity attributable to holders of the Parent Company.

An increase or decrease in ownership interest in a subsidiary that does not result in a loss of control is accounted for as an equity transaction. The carrying amounts of the controlling and non-controlling interests are adjusted to reflect the changes in the Jollibee Group's relative interests in the subsidiary. The Jollibee Group recognizes directly in equity any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received, and attribute it to the equity holders of the Parent Company. These increases or decreases in the ownership interest in a subsidiary do not result in the recognition of a gain or loss.

The consolidated financial statements include the accounts of the Parent Company and the following wholly-owned and majority-owned subsidiaries as at December 31, 2015 and 2014:

### 3. SIGNIFICANT ACCOUNTING POLICIES

#### Current versus Noncurrent Classification

The Jollibee Group presents assets and liabilities in the consolidated statement of financial position based on current/noncurrent classification. An asset is classified as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as noncurrent.

A liability is classified as current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Jollibee Group classifies all other liabilities as noncurrent.

#### Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

#### Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.
The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant’s ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The fair value for financial instruments traded in active markets at the reporting date is based on their quoted price or binding dealer price quotations, without any deduction for transaction costs where the Jollibee Group has financial assets and financial liabilities with offsetting positions in market risks or counterparty credit risk, it has elected to use the measurement exception to measure the fair value of its net risk exposure by applying the bid or ask price to the net open position as appropriate. For all other financial instruments not traded in an active market, the fair value is determined by using valuation techniques deemed to be appropriate in the circumstances. Valuation techniques include the market approach (i.e., using recent arm’s length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (i.e., discounted cash flow analysis and option pricing models making as much use of available an supportable market data as possible).

The Jollibee Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest-level input that is significant to the fair value measurement as a whole:

- **Level 1** - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- **Level 2** - Valuation techniques for which the lowest-level input that is significant to the fair value measurement is directly or indirectly observable
- **Level 3** - Valuation techniques for which the lowest-level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Jollibee Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest-level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Jollibee Group’s management determines the policies and procedures for both recurring fair value measurement and non-recurring measurement. At each reporting date, the management analyzes the movements in the values of assets and liabilities which are required to be remeasured or reassessed as per the Jollibee Group’s accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

For the purpose of fair value disclosures, the Jollibee Group has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

**Financial Instruments**

**Initial recognition and measurement**

Financial assets are classified, at initial recognition, as financial assets at fair value through profit or loss (FVPL), loans and receivables, held-to-maturity (HTM) investments, AFS financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at FVPL, transaction costs that are attributable to the acquisition of the financial asset.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Jollibee Group commits to purchase or sell the asset.

**Subsequent measurement**

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at FVPL
- Loans and receivables
- Held-to-maturity investments
- AFS financial assets

**Financial Asset at FVPL**

Financial assets at FVPL include financial assets held for trading and financial assets designated upon initial recognition at FVPL. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separate embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments as defined by PAS 39. The Jollibee Group has not designated any financial assets at FVPL. Financial assets at FVPL are carried in the consolidated statement of financial position at fair value with net changes in fair value recognized in profit or loss.

Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at FVPL. These embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the FVPL.
This category generally applies to the Jollibee Group’s derivative assets.

Loans and Receivables. This category is the most relevant to the Jollibee Group. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is recognized in profit or loss. The losses arising from impairment are recognized also in profit or loss.

This category generally applies to cash and cash equivalents, short-term investments, receivables, advances to related parties, refundable deposits and employees’ car plan receivables.

AFS Financial Assets. AFS financial assets include equity investments and debt securities. Equity investments classified as AFS are those that are neither classified as held for trading nor designated at FVPL. Debt securities in this category are those that are intended to be held for an indefinite period of time and that may be sold in response to needs for liquidity or in response to changes in the market conditions.

After initial measurement, AFS financial assets are subsequently measured at fair value with unrealized gains or losses recognized in OCI and credited directly in equity until the investment is derecognized, at which time, the cumulative gain or loss is recognized in profit or loss, or the investment is determined to be impaired, when the cumulative loss is reclassified from equity to profit or loss. Dividends and interest earned while holding AFS financial assets is recognized in profit or loss.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or a part of a group of similar financial assets) is primarily derecognized (i.e., removed from the consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or
- The Jollibee Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; and either (a) the Jollibee Group has transferred substantially all the risks and rewards of the asset; or (b) the Jollibee Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Jollibee Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Jollibee Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Jollibee Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Jollibee Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Jollibee Group could be required to repay.
Impairment losses on equity investments are not reversed through profit or loss, increases in their fair value after impairment are recognized in OCI.

The determination of what is ‘significant’ or ‘prolonged’ requires judgment. In making this judgment, the Jollibee Group evaluates, among other factors, the duration or extent to which the fair value of an investment is less than its cost.

In the case of debt instruments classified as AFS financial assets, the impairment is assessed based on the same criteria as financial assets carried at amortized cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortized cost and the current fair value, less any impairment loss on that investment previously recognized in profit or loss.

Future interest income continues to be accrued based on the reduced carrying amount of the asset, using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded in profit and loss. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized, the impairment loss is reversed through profit or loss.

Financial liabilities

Initial recognition and measurement
Financial liabilities are classified, at initial recognition, as financial liabilities at FVPL, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, not of directly attributable transaction costs.

The Jollibee Group’s financial liabilities include trade and other payables, loans and borrowings and derivative financial instruments.

Subsequent measurement
The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at FVPL. Financial liabilities at FVPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVPL.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Jollibee Group that are not designated as hedging instruments in hedge relationships as defined by PAS 39. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in profit or loss.

Financial liabilities designated upon initial recognition at FVPL are designated at the initial date of recognition, and only if the criteria in PAS 39 are satisfied. The Jollibee Group has not designated any financial liability as at FVPL.

Loans and borrowings. This is the category most relevant to the Jollibee Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as interest expense in the consolidated statement of comprehensive income.

This category generally applies to interest-bearing loans and borrowings.

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in profit or loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously. The Jollibee Group assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Company and all of the counterparties.

Derivative Financial Instruments and Hedge Accounting

Initial recognition and subsequent measurement. The Group uses derivative financial instruments, such as cross currency swaps and interest rate swaps to hedge its foreign currency risks and interest rate risks, respectively. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognized in OCI and later reclassified to profit or loss when the hedge item affects profit or loss.

For the purpose of hedge accounting, hedges are classified as:

- **Fair value hedges** when hedging the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment;
- **Cash flow hedges** when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment, or
- **Hedges of a net investment in a foreign operation.**
At the inception of a hedge relationship, the Jollibee Group formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

**Fair value hedges.** The change in the fair value of a hedging instrument is recognized in profit or loss. The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognized in profit or loss.

For fair value hedges relating to items carried at amortized cost, any adjustment to carrying value is amortized through profit or loss over the remaining term of the hedge using the EIR method. EIR amortization may begin as soon as an adjustment exists and no later than when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged.

If the hedged item is derecognized, the unamortized fair value is recognized immediately in profit or loss.

When an unrecognized firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognized as an asset or liability with a corresponding gain or loss recognized in profit and loss.

The Jollibee Group has no fair value hedges as at December 31, 2015 and 2014, respectively.

**Cash flow hedges.** The effective portion of the gain or loss on the hedging instrument is recognized in OCI while any ineffective portion is recognized immediately in the statement of profit or loss.

The Jollibee Group has a cross currency swap to hedge its exposure to foreign currency risk in forecast transactions, as well as an interest rate swap for its exposure to volatility in interest rates. The ineffective portion relating to these swaps are recognized in profit or loss.

Amounts recognized as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged income or expense is recognized or when a forecast sale occurs.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognized in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

**Debt Issue Costs.** Debt issue costs are deducted against long-term debt and are amortized over the terms of the related borrowings.

**Inventories.** Inventories are valued at the lower of cost and net realizable value. Costs are accounted for as follows:

**Processed inventories** - Standard costing, is reviewed on a quarterly basis and revised as necessary to approximate current costs determined using first in, first out (FIFO). Cost includes direct materials, labor and a proportion of manufacturing overhead costs based on normal operating capacity.

**Food supplies, packaging, store and other supplies, and novelty items** - Standard costing is reviewed on a quarterly basis and revised as necessary to approximate current costs determined using FIFO.

Net realizable value of processed inventories is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Net realizable value of food supplies, packaging, store and other supplies is the current replacement cost.

Net realizable value of novelty items is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

**Other Current Assets.** Other current assets include deposits which pertain to advance payments to suppliers to be applied for future purchases, prepaid expenses which are paid in advance and recorded as asset before these are utilized; and creditable withholding taxes, which will be applied in the following year against corporate income tax or be claimed for refund with the Bureau of Internal Revenue.

**Property, Plant and Equipment.** Property, plant and equipment, except land, are stated at cost less accumulated depreciation and amortization and any accumulated impairment in value. Such cost includes the cost of replacing part of property, plant and equipment at the time that cost is incurred, if the recognition criteria are met, and excludes the costs of day-to-day servicing. Land is stated at cost less any impairment in value.

The initial cost of property, plant and equipment consists of its purchase price, including import duties and nonrefundable taxes and any other costs directly attributable in bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, are normally charged to profit or loss in the year in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property, plant and equipment.
Depreciation and amortization are calculated on a straight-line basis over the following estimated useful lives of the assets:

- Land improvements: 5 years
- Plant, buildings, condominium units and improvements: 5 - 40 years
- Leasehold rights and improvements: 2 - 10 years or term of the lease, whichever is shorter
- Office, store and food processing equipment: 1 - 15 years
- Furniture and fixtures: 3 - 5 years
- Transportation equipment: 3 - 5 years

An item of property, plant, and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period the asset is derecognized.

The residual values, if any, useful lives and depreciation and amortization method of the assets are reviewed and adjusted, if appropriate, at the end of each financial period.

Fully depreciated assets are retained in the accounts until they are disposed or retired.

Construction in progress represents assets under construction and is stated at cost less any impairment in value. This includes the cost of construction and other direct costs. Cost also includes interest on borrowed funds incurred during the construction period. Construction in progress is not depreciated until such time that the relevant assets are completed and ready for use.

Investment Properties

Investment properties consist of land and buildings and building improvements held by the Jollibee Group for capital appreciation and rental purposes. Investment properties, except land, are carried at cost, including transaction costs, less accumulated depreciation and amortization and any impairment in value. Cost also includes the cost of replacing part of an existing investment property at the time cost is incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property. Land is carried at cost less any impairment in value.

The depreciation of buildings and building improvements are calculated on a straight-line basis over the estimated useful lives of the assets which are five (5) to twenty (20) years.

The residual values, if any, useful lives and method of depreciation and amortization of the assets are reviewed and adjusted, if appropriate, at each financial year-end.

Investment property is derecognized when either it has been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal.

Transfers to investment property are made only when there is a change in use, evidenced by ending of ownership-occupation, or commencement of an operating lease to another party. Transfers from investment property are made only when there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sell.
Impairment Testing of Goodwill. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition-date, allocated to each of the Jollibee Group’s CGU, or groups of CGUs, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units. Each unit or group of units to which the goodwill is allocated:

- represents the lowest level within the Jollibee Group at which the goodwill is monitored for internal management purposes; and
- is not larger than an operating segment as defined in PFRS 8, Operating Segments, before aggregation.

Frequency of Impairment Testing. Irrespective of whether there is any indication of impairment, the Jollibee Group tests goodwill acquired in a business combination for impairment annually as at December 31 and more frequently when circumstances indicate that the carrying amount is impaired.

Allocation of Impairment Loss. An impairment loss is recognized for a CGU if the recoverable amount of the unit or group of units is less than the carrying amount of the unit or group of units. The impairment loss is allocated to reduce the carrying amount of the assets of the unit or group of units first to reduce the carrying amount of goodwill allocated to the CGU or group of units and then to the other assets of the unit or group of units pro rata on the basis of the carrying amount of each asset in the unit or group of units.

Intangible Assets
Intangible assets acquired separately are measured at cost on initial recognition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment loss. The useful lives of intangible assets are assessed at the individual asset level as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life using the straight-line method and assessed for impairment whenever there is an indication that the intangible assets may be impaired. At a minimum, the amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the CGU level. Such intangible assets are not amortized. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

The estimated useful lives used in amortizing computer software and other intangible assets are disclosed in Note 14.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss when the asset is derecognized.

Interests in and Advances to Joint Ventures, Co-venturers and an Associate
An associate is an entity over which the Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The Jollibee Group’s investments in its associate and joint ventures are accounted for using the equity method based on the percentage share of ownership and capitalization. Interests in joint ventures are accounted for under the equity method from the date the joint control is obtained.

Under the equity method, the investment in an associate or joint ventures are carried in the consolidated statement of financial position at cost plus the Jollibee Group’s share in post-acquisition changes in the net assets of an associate or joint ventures, less any impairment loss. Goodwill relating to the associate or joint ventures is included in the carrying amount of the investment and is not amortized. The consolidated statement of comprehensive income includes the Jollibee Group’s share in the financial performance of the associate or joint ventures. The Jollibee Group’s share in profit or loss of the associate is shown on the face of the consolidated statement of comprehensive income as “Equity in net losses of joint ventures and an associate”, which is the profit or loss attributable to equity holders of the joint ventures and associate.

The Jollibee Group ceases to use the equity method of accounting on the date from which it no longer has joint control in the joint ventures, no longer has significant influence over an associate, or when the interest becomes held for sale.

Upon loss of significant influence over the associate or joint control over the joint ventures, the Jollibee Group measures and recognizes its remaining investment at its fair value. Any difference between the carrying amount of the associate or former jointly controlled entities upon loss of significant influence or joint control, and the fair value of the remaining investment and proceeds from disposal is recognized in profit or loss. When the remaining interest in joint ventures constitutes significant influence, it is accounted for as interest in an associate.
Impairment of Nonfinancial Assets
The carrying values of interests in and advances to joint ventures, co-venturers and an associate, property, plant and equipment, investment properties, goodwill and other intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. If any such indication exists, and if the carrying value exceeds the estimated recoverable amount, the assets or CGU are written down to their recoverable amounts. The recoverable amount of the asset is the greater of fair value less costs to sell or value in use. If the recoverable amount of an asset is less than its carrying amount, an impairment loss is recognized. If the recoverable amount of a CGU is less than its carrying amount, the impairment loss is allocated to the individual assets of the CGU on a pro rata basis over its remaining useful life.

For nonfinancial assets, excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset’s recoverable amount since the last impairment loss was recognized. If it is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such a reversal, the depreciation charge is reduced but not below zero.

Equity
Capital Stock and Additional Paid-in Capital. Capital stock is measured at par value for all shares issued. Proceeds and/or fair value of considerations received in excess of par value, if any, are recognized as additional paid-in capital. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as a deduction from proceeds, net of tax.

Additional paid-in capital is also credited for the cost of the Jollibee Group’s equity settled share-based payments to its employees.

Subscriptions Receivable. Subscriptions receivable represents common stock subscribed and issued by the Parent Company but payment from the shareholders has not yet been received.

Retained Earnings. Retained earnings represent the Jollibee Group’s accumulated earnings, net of dividends declared.

Dividends. The Jollibee Group recognizes a liability to make cash distribution to its equity holders when the distribution is authorized and the distribution is no longer at the discretion of the Group. A corresponding amount is recognized directly in the equity. Dividends for the year that are approved after the financial reporting date are dealt with as an event after the reporting period.

Interest Income. Interest income is recognized as the interest accrues, taking into account the effective interest rate.

Rent Income. Rent income from operating leases is recognized on a straight-line basis over the lease terms.

Other Income. Other income is recognized when there is an incidental economic benefit, other than the usual business operations, that will flow to the Jollibee Group through an increase in asset or reduction in liability and that can be measured reliably.

Cost and Expenses. Cost and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Cost and expenses are recognized as incurred.

Treasury Shares. Acquisitions of treasury shares are recorded at cost. The total cost of treasury shares is shown in the consolidated statement of financial position as a deduction from the total equity. Upon re-issuance or resale of the treasury shares, cost of common stock held in treasury account is credited for the cost of the treasury shares determined using the simple average method. Gain on sale is credited to additional paid-in capital. Losses are charged against additional paid-in capital but only to the extent of previous gain from original issuance, sale or retirement for the same class of stock. Otherwise, losses are charged to retained earnings.

Revenue
Revenue is recognized to the extent that it is probable that the economic benefits associated with the transaction will flow to the Jollibee Group and the amount of revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding discounts, rebates, sales taxes and duties. The Jollibee Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Jollibee Group has concluded that it is acting as a principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements, has pricing latitude, and is also exposed to credit risks.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of Goods. Revenue from sale of goods is recognized when the significant risks and rewards of ownership of the goods have passed to the customers, which is normally upon delivery. Sales returns and sales discounts are deducted from sales to arrive at net sales shown in the consolidated statement of comprehensive income.

Royalty Fees. Revenue from royalty fees is recognized as the royalty accrues based on a certain percentage of the franchisees’ net sales.

Franchise Fees. Revenue from franchise fees is recognized when all services or conditions relating to the payment of franchise fees have been substantially performed.

Service Fees. Revenue is recognized in the period in which the service has been rendered.

Interest Income. Interest income is recognized as the interest accrues, taking into account the effective yield on the asset.

Other Income. Other income is recognized when there is an incidental economic benefit, other than the usual business operations, that will flow to the Jollibee Group through an increase in asset or reduction in liability and that can be measured reliably.

Cost and Expenses. Cost and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Cost and expenses are recognized as incurred.
Advertising and promotions expenses include costs incurred for advertising schemes and promotional activities for new products. The amount of expenses incurred by the Jollibee Group is reduced by the network advertising and promotional costs reimbursed by the Jollibee Group’s franchisees and subsidiaries.

**Borrowing Costs**
Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

**Pension Benefits**
The pension liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

**Defined benefit costs comprise the following:**
- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as part of pension costs in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the pension liability or asset is the change during the period in the liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the pension liability or asset is recognized under “Cost of Sales” and “General and Administrative expenses” in the consolidated statement of comprehensive income.

Remeasurements comprising actuarial gains and losses, return on plan liability or assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Jollibee Group, nor can they be paid directly to the Jollibee Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Jollibee Group also participates in various government-defined contribution schemes for the People’s Republic of China (PRC)-based and USA-based subsidiaries. Under these schemes, pension benefits of existing and retired employees are guaranteed by the local pension benefit plan, and each subsidiary has no further obligations beyond the annual contribution.

**Employee Leave Entitlement**
Employee entitlements to annual leave are recognized as a liability when they are accrued to the employees. Jollibee Group recognizes undiscounted liability for leave expected to be settled wholly before twelve months after the end of the annual reporting period.

**Share-based Payments**
The Jollibee Group has stock option plans granting its management and employees an option to purchase a fixed number of shares of stock at a stated price during a specified period (“equity-settled transactions”).

The cost of the options granted to the Jollibee Group’s management and employees that becomes vested is recognized in profit or loss over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant management and employees become fully entitled to the award (“vesting date”).

The fair value is determined using the Black-Scholes Option Pricing Model. The cumulative expense recognized for the share-based transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Jollibee Group’s best estimate of the number of equity instruments that will ultimately vest. The charge or credit in profit or loss or the investment account for a period represents the movement in cumulative expense recognized as of the beginning and end of that period.

No expense is recognized for awards that do not ultimately vest, provided that all other performance conditions are satisfied.

Where the terms of a share-based award are modified, as a minimum, an expense is recognized as if the terms had not been modified. In addition, an expense is recognized for any modification, which increases the total fair value of the share-based payment agreement, or is otherwise beneficial to the management and employees as measured at the date of modification.

Where a share-based award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if there were a modification of the original award.

**Research Costs**
Research costs are expensed as incurred.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Leases
The determination of whether an arrangement is, or contains a lease is based on the substance of the agreement at inception date of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Jollibee Group as Lessee. Leases which do not transfer to the Jollibee Group substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as expense in profit or loss on a straight-line basis over the lease term and carried at amortized cost. The related accretion is recognized as interest income and the amortization as rent expense. Associated costs, such as maintenance and insurance, are expensed as incurred. Contingent rent is recognized as expense in the period which they are incurred.

Jollibee Group as Lessor. Leases which do not transfer to the lessee substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rent income. Rent income from operating leases is recognized as income in profit or loss on a straight-line basis over the lease term. Contingent rents are recognized as revenue in the period in which they are earned.

Provisions
Provisions are recognized when the Jollibee Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Foreign Currency Transactions and Translations
The consolidated financial statements are presented in Philippine peso, which is the Parent Company’s functional and presentation currency. Each entity in the Jollibee Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. The functional currency of subsidiaries domiciled and operating in the Philippines are also determined to be the Philippine Peso. Where the functional currency is the Philippine Peso, transactions in foreign currencies are recorded in Philippine Peso using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the closing rate of exchange at reporting date. All differences are recognized in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

The functional currencies of the Jollibee Group’s foreign operations are US dollar (USD), PRC Renminbi (RMB), Indonesia rupiah, Vietnam dong and Hong Kong dollar. As of the reporting date, the assets and liabilities of foreign subsidiaries are translated into the presentation currency of the Parent Company at the rate of exchange ruling at the reporting date while the income and expense accounts are translated at the weighted average exchange rates for the year. The resulting translation differences are included in the consolidated statement of changes in equity under the account “Cumulative translation adjustments of foreign subsidiaries and share in cumulative translation adjustment of an interest in a joint venture”. On disposal of a foreign subsidiary, the accumulated exchange differences are recognized in profit or loss.
Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognized subsequently if new information about facts and circumstances change. The adjustment is either treated as reduction in goodwill, as long as it does not exceed goodwill, if it was incurred during the measurement period or recognize in profit or loss.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value Added Tax (VAT). Revenue, expenses and assets are recognized net of the amount of tax, except:
- where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable, and
- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of "Other current assets" or "Trade payables and other current liabilities" accounts in the consolidated statement of financial position.

Earnings per Share (EPS) Attributable to Equity Holders of the Parent Company
Basic EPS is calculated by dividing the net income for the year attributable to the equity holders of the Parent Company by the weighted average number of common shares outstanding during the year, after considering the retroactive effect of stock-dividend declaration, if any.

Diluted EPS is computed by dividing the net income for the year attributable to the equity holders of the Parent Company by the weighted average number of common shares outstanding during the period, adjusted for any potential common shares resulting from the assumed exercise of outstanding stock options. Outstanding stock options will have dilutive effect under the treasury stock method only when the average market price of the underlying common share during the period exceeds the exercise price of the option.

Where the EPS effect of the shares to be issued to management and employees under the stock option plan would be anti-dilutive, the basic and diluted EPS would be stated at the same amount.

Contingencies
Contingent liabilities are not recognized in the consolidated financial statements but are disclosed in the notes to financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed when an inflow of economic benefits is probable.

Business Segments
The Jollibee Group is organized and managed separately according to the nature of operations and geographical locations of businesses. The three major operating businesses of the Jollibee Group are food service, franchising and leasing while geographical segments are segregated to Philippine geographical locations of businesses. These operating and geographical businesses are the basis upon which the Jollibee Group reports its primary segment information presented in Note 5.

Events after the Reporting Period
Post year-end events that provide additional information about the Jollibee Group’s financial position at reporting date (adjusting events) are reflected in the Jollibee Group’s consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

4. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts in the consolidated financial statements and related notes at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the affected asset or liability in the future. The Jollibee Group believes the following represents a summary of these significant judgments, estimates and assumptions and the related impact and associated risks on the Jollibee Group’s consolidated financial statements.

Judgments
In the process of applying the Jollibee Group’s accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements.

Functional Currency: Management has determined that the functional and presentation currency of the Parent Company and its Philippine-based subsidiaries is the Philippine peso, being the currency of the primary environment in which the Parent Company and its major subsidiaries operate. The functional currencies of its foreign operations are determined as the currency in the country where the subsidiary operates. For consolidation purposes, the foreign subsidiaries’ balances are translated to Philippine peso which is the Parent Company’s functional and presentation currency.

Operating Lease Commitments - Jollibee Group as Lessee: The Jollibee Group has entered into commercial property leases for its QSRs and offices as a lessee. Management has determined, based on an evaluation of the terms and condition of the arrangements that all the significant risks and benefits of ownership of these properties, which the Jollibee Group leases under various lease arrangements, remain with the lessors. Accordingly, the leases are accounted for as operating leases.

Rent expense amounted to P7,841.9 million, P7,702.7 million and P6,287.3 million in 2015, 2014 and 2013, respectively (see Notes 21, 22 and 29).

Operating Lease Commitments - Jollibee Group as Lessor: The Jollibee Group has entered into commercial property leases on its investment property portfolio and various sublease agreements. Management has determined, based on an evaluation of the terms and condition of the arrangements, that the Jollibee Group retains all the significant risks and benefits of ownership of the properties which are leased out. Accordingly, the leases are accounted for as operating leases.

Rent income amounted to P92.4 million, P90.6 million and P97.5 million in 2015, 2014 and 2013, respectively (see Notes 20 and 29).
Assessing Joint Control of an Arrangement and the Type of Arrangement. Joint control is the contractually agreed sharing of control of an arrangement which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control. The Jollibee Group assessed that it has joint control in all joint arrangements by virtue of a contractual agreement with other stockholders. The Jollibee Group’s joint ventures have separate legal entity and the shareholders have right to their net assets (see Note 11).

Material Partly-Owned Subsidiaries
The consolidated financial statements include additional information about subsidiaries that have non-controlling interests that are material to the Jollibee Group (see Note 11). Management determined material partly-owned subsidiaries as those with balance of non-controlling interest greater than 5% of total non-controlling interests and those subsidiaries which type of activities they engage in is important to the Jollibee Group as at end of the year.

Material Associates and Joint Ventures
The consolidated financial statements include additional information about associates and joint ventures that are material to the Jollibee Group (see Note 11). Management determined material associates as those associates where the Jollibee Group’s carrying amount of investment is greater than 5% of the total investments in an associate and interest in joint ventures as at end of the year.

Estimates and Assumptions
The key estimates and assumptions concerning the future and other key sources of estimation uncertainty at reporting date that has a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. The Jollibee Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to changes on market circumstances arising beyond the control of the Jollibee Group. Such changes are reflected in the assumptions when they occur.

Impairment of Receivables. The Jollibee Group maintains an allowance for impairment losses at a level considered adequate to provide for potential uncollectible receivables. The level of allowance is evaluated on the basis of factors that affect the collectability of the accounts. These factors include, but are not limited to, the length of the Jollibee Group’s relationship with the customers and counterparties, average age of accounts and collection experience. The Jollibee Group performs a regular review of the age and status of these accounts, designed to identify accounts with objective evidence of impairment and provide the appropriate allowance for impairment losses. The review is done quarterly and annually using a combination of specific and collective assessments. The amount and timing of recorded expenses for any period would differ if the Jollibee Group made different judgments or utilized different methodologies. An increase in allowance account would increase general and administrative expenses and decrease current assets.

Provision for impairment loss on receivables in 2015, 2014 and 2013 amounted to ₱325.9 million, ₱363 million and ₱340.0 million, respectively, resulting from specific and collective assessments (see Note 22). In addition, reversal of previously recognized provisions amounting to ₱16.6 million and ₱9.9 million were recognized in 2015 and 2014, respectively (see Note 22). The carrying amount of receivables amounted to ₱5,432.8 million and ₱5,937.4 million as at December 31, 2015 and 2014, respectively (see Note 7).

Net Realizable Value of Inventories. The Jollibee Group writes down inventories to net realizable value, through the use of an allowance account, whenever the net realizable value of inventories becomes lower than the cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes.

The estimates of net realizable value are based on the most reliable evidence available at the time the estimates are made of the amounts the inventories are expected to be realized. These estimates take into consideration fluctuations of prices or costs directly relating to events occurring after reporting date to the extent that such events confirm conditions existing at reporting date. The allowance account is reviewed on a regular basis to reflect the accurate valuation in the financial records.

The Jollibee Group assessed that the net realizable value for some inventories is lower than cost, hence, it recognized provision for inventory obsolescence amounting to ₱11.0 million, ₱11.1 million and ₱9.4 million in 2015, 2014 and 2013, respectively (see Note 22). In addition, reversal of previously recognized provisions amounting to ₱12.0 million and ₱6.5 million were recognized in 2015 and 2014, respectively, while no reversal was recognized in 2013 (see Note 22). No write-offs were made in 2015 and 2014. The carrying amount of inventories amounted to ₱5,478.4 million and ₱5,971.8 million as at December 31, 2015 and 2014, respectively (see Note 8).

Impairment of Property, Plant and Equipment, Investment Properties, Interests in and Advances to Joint Ventures, Co-venturers and an Associate. The Jollibee Group performs impairment review of property, plant and equipment, investment properties, investment properties interests in and advances to joint ventures, co-venturers and an associate when certain impairment indicators are present. Determining the fair value of assets, which requires the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Jollibee Group to make estimates and assumptions that can materially affect the consolidated financial statements. Future events could cause the Jollibee Group to conclude that the assets are impaired. Any resulting impairment loss could have a material adverse impact on the Jollibee Group’s financial position and performance.

Reversal of impairment loss amounted to nil, ₱2.6 million and ₱13.3 million in 2015, 2014 and 2013, respectively, while provision for impairment loss amounted to ₱20.0 million in 2014 (see Note 22). The aggregate carrying values of property, plant and equipment, investment properties, interests in and advances to joint ventures, co-venturers and an associate amounted to ₱3,994.6 million and ₱2,778.1 million as at December 31, 2015 and 2014, respectively (see Notes 11, 12 and 13).

Estimation of Useful Lives of Property, Plant and Equipment and Investment Properties. The Jollibee Group estimates the useful lives of property, plant and equipment and investment properties based on the period over which the property, plant and equipment and investment properties are expected to be available for use and on the collective assessment of the industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives of property, plant and equipment and investment properties are reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits in the use of property, plant and equipment and investment properties. However, it is possible that future financial performance could be materially affected by changes in the estimates brought about by changes in the factors mentioned above. The amount and timing of recording the depreciation and amortization for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of property, plant and equipment and investment properties would increase the recorded depreciation and amortization and decrease noncurrent assets.
There was no change in the estimated useful lives of property, plant and equipment and investment properties in 2015 and 2014.

Impairment of Goodwill and Other Intangible Assets. The Jollibee Group determines whether goodwill and other intangible assets with indefinite useful life is impaired at least on an annual basis or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. This requires an estimation of the value in use of the CGU to which the goodwill is allocated. Estimating the value in use requires the Jollibee Group to make an estimate of the expected future cash flows from the CGU and also to choose a suitable discount rate in order to calculate the present value of those cash flows.

Management has determined that goodwill and other intangible assets are not impaired. The carrying amount of goodwill and other intangible assets amounted to ₱9,412.1 million and ₱9,385.1 million as at December 31, 2015 and 2014, respectively (see Note 14).

Realizability of Deferred Tax Assets. The carrying amounts of deferred tax assets at each reporting date is reviewed and reduced to the extent that sufficient taxable profits available to allow all or part of the deferred tax assets to be utilized. The Jollibee Group's assessment on the recognition of deferred tax assets is based on the forecasted taxable income. This forecast is based on past results and future expectations on revenue and expenses.

The carrying amount of deferred tax assets amounted to ₱2,275.2 million and ₱1,535.0 million as at December 31, 2015 and 2014, respectively (see Note 24).

Present Value of Defined Benefit Obligation. The pension expense as well as the present value of the defined benefit obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates and the future salary increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

Future salary increases are based on budgetary salary increases.

The carrying amount of pension liability amounted to ₱1,466.5 million and ₱832.4 million as at December 31, 2015 and 2014, respectively (see Note 25).

Share-based Payments. The Parent Company measures the cost of its equity-settled transactions with management and employees by reference to the fair value of the equity instruments at the grant date. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. The estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about these inputs. The fair value of the share option is being determined using the Black-Scholes Option Pricing Model. The expected life of the stock options is based on the expected exercise behavior of the stock option holders and is not necessarily indicative of the exercise patterns that may occur. The volatility is based on the average historical price volatility which may be different from the expected volatility of the shares of the Parent Company.

Total expense arising from share-based payment recognized by the Jollibee Group amounted to ₱173.2 million, ₱166.5 million and ₱150.4 million in 2015, 2014 and 2013, respectively (see Notes 22 and 26).

Fair Value of Financial Assets and Liabilities. When the fair values of financial assets and financial liabilities recorded or disclosed in the consolidated statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques, including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

The fair value of financial assets and liabilities are discussed in Note 31.

Derivative on Put / Call Rights on SJBF LLC. The Jollibee Group has derivatives arising from put / call rights on the controlling interest in SJBF LLC.

The derivative from put / call rights derive value from the fair value of SJBF LLC’s equity, which considers forecasted cash flows from its operations and its cost of capital, and the price to exercise such put / call rights, which consider SJBF LLC’s EBITDA near transaction date and exit multiples based on SJBF LLC’s achievement of sales targets. Such derivative is valued using the binomial option pricing model, which also takes into account assumptions on the volatility of the fair value of SJBF LLC’s equity and discount rate to arrive at present value, among others. Changes in the assumptions mentioned above can result to change in the amount recognized as derivative and may result to either a derivative asset or liability as recognized in the consolidated statement of financial position.

As at December 31, 2015, the Jollibee Group recognized a derivative asset amounting to ₱75.0 million from put / call rights (see Note 11).

Contingent Consideration or Earn-out. The Jollibee Group has existing joint venture agreements with contingent consideration or earn-out provisions. This requires the estimation of payout associated with the probability-weighted discounted cash flow model, taking into consideration the specific conditions outlined in the purchase agreement that must be met to satisfy the contingency.

Jollibee Group estimated nil earn-out as at December 31, 2015 and 2014.

Provisions. The Jollibee Group recognizes a provision for an obligation resulting from a past event when it has assessed that it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. These assessments are made based on available evidence, including the opinion of experts. Future events and developments may result in changes in these assessments which may impact the Jollibee Group’s financial position and performance.

There were no additional provisions recorded in 2015, 2014 and 2013. Total outstanding provisions amounted to ₱10.5 million as at December 31, 2015 and 2014 (see Note 17).

Contingencies. The Jollibee Group is involved in litigations, claims and disputes which are normal to its business. The estimate of the probable costs for the resolution of these claims has been developed in consultation with the Jollibee Group’s legal counsel and based upon an analysis of potential results. Management believes that the ultimate liability, if any, with respect to the litigations, claims and disputes will not materially affect the financial position and performance of the Jollibee Group.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

5. SEGMENT INFORMATION

For management purposes, the Jollibee Group is organized into segments based on the nature of the products and services offered and geographical locations. The Executive Management Committee monitors the operating results of its segments separately for resource allocation and performance assessment. Segment results are evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the consolidated financial statements.

Business Segments
The Jollibee Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

- The food service segment is involved in the operations of QSRs and the manufacture of food products to be sold to Jollibee Group-owned and franchised QSR outlets.
- The franchising segment is involved in the franchising of the Jollibee Group's QSR store concepts.
- The leasing segment leases store sites mainly to the Jollibee Group's independent franchisees.

The following tables present certain information on revenues, expenses, assets and liabilities and other segment information of the different business segments as at and for the years ended December 31, 2015 and 2014.

<td>5,936,387,052</td>
<td>4,165,160,508</td>
<td>–</td>
<td>–</td>
</tr>
<tr>
<td>Short-term deposits</td>
<td>5,268,420,890</td>
<td>3,049,632,697</td>
<td>–</td>
<td>–</td>
</tr>
</tbody>
</table>

Cash in banks earn interest at the respective savings or special demand deposit rates. Short-term deposits
are made for varying periods of up to three months depending on the immediate cash requirements of the Jollibee Group.

The Jollibee Group also has short-term investments amounting to P1,223.3 million as at December 31, 2015. These pertain to
deposits with maturities of more than three months but less than a year.

Interest income earned from cash in bank, short-term deposits and short-term investments amounted to P118.0 million, P11.8 million
and P145.6 million for 2015, 2014 and 2013, respectively (see Note 23).
7. RECEIVABLES

This account consists of:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trade</td>
<td>₱5,575,193,914</td>
<td>₱7,795,413,797</td>
</tr>
<tr>
<td>Less allowance for impairment loss</td>
<td>520,055,036</td>
<td>208,940,071</td>
</tr>
<tr>
<td>Advances to employees</td>
<td>5,055,138,878</td>
<td>7,586,473,726</td>
</tr>
<tr>
<td>Current portion of employee car plan receivables</td>
<td>67,461,983</td>
<td>65,327,161</td>
</tr>
<tr>
<td>Others</td>
<td>155,504,667</td>
<td>128,536,704</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>₱5,432,775,539</td>
<td>₱7,937,404,797</td>
</tr>
</tbody>
</table>

Trade receivables are noninterest-bearing and are generally settled on 30-60 day terms.

Advances to employees, current portion of employee car plan receivables and other receivables are normally collectible within the next financial year. Other receivables consist of receivables from the retirement plan and the Social Security System (SSS) and insurance claims. Certain current assets in 2014 totaling ₱316.2 million were reclassified to trade receivables to conform with 2015 presentation.

The movements in the allowance for impairment loss on trade receivables as at December 31 are as follows:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balance at beginning of year</td>
<td>₱208,940,071</td>
<td>₱274,461,799</td>
</tr>
<tr>
<td>Provisions (see Note 22)</td>
<td>325,907,626</td>
<td>36,301,470</td>
</tr>
<tr>
<td>Write-offs (see Note 22)</td>
<td>(11,154,044)</td>
<td>(101,112,448)</td>
</tr>
<tr>
<td>Reversals (see Note 22)</td>
<td>(4,605,656)</td>
<td>(888,308)</td>
</tr>
<tr>
<td>Translation adjustments</td>
<td>967,039</td>
<td>-</td>
</tr>
<tr>
<td><strong>Balance at end of year</strong></td>
<td>₱18,180,388</td>
<td>₱19,143,425</td>
</tr>
</tbody>
</table>

The provisions in 2015 and 2014 resulted from specific and collective impairment assessments performed by the Jollibee Group.

8. INVENTORIES

This account consists of:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>At cost:</td>
<td></td>

<tr>
<td><strong>Total inventories at lower of cost and net realizable value</strong></td>
<td>₱5,478,416,309</td>
<td>₱5,971,813,991</td>
</tr>
</tbody>
</table>

The cost of novelty items carried at net realizable value amounted to ₱90.5 million and ₱7.5 million as at December 31, 2015 and 2014, respectively.

The movements in the allowance for inventory obsolescence as at December 31 are as follows:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balance at beginning of year</td>

</tr>
<tr>
<td><strong>Total</strong></td>
<td>₱3,828,229,080</td>
<td>₱2,493,699,399</td>
</tr>
</tbody>
</table>

Deposits to suppliers are generally applied to purchase of inventories and availment of services within the next financial year.

Prepaid expenses mainly represent creditable withholding taxes that can be applied in the following year against the corporate income tax due from Jollibee Group or can be claimed as tax refund from the BIR.

Prepaid expenses - others include unused portion of advance payment for advertising, insurance and other expenses in 2015 and 2014.

10. AVAILABLE-FOR-SALE FINANCIAL ASSETS

This account consists mainly of shares in golf and leisure clubs amounting to ₱21.5 million each as at December 31, 2015 and 2014.
11. BUSINESS COMBINATIONS, INCORPORATION OF NEW SUBSIDIARIES, AND INTERESTS IN AND ADVANCES TO JOINT VENTURES, CO-VENTURERS AND AN ASSOCIATE

A. Business Combinations

Business Combination through Acquisition of Equity Shares

Acquisitions in 2012 and Prior

San Pin Wang. On March 9, 2012, the Jollibee Group, through JWPL, completed its acquisition of 55% equity interest Guangxi San Pin Wang Food and Beverage Management Company Limited ("San Pin Wang") which operates the San Pin Wang beef noodle business in South China for a total acquisition cost of RMB30.0 million (P195.9 million). The Jollibee Group paid RMB20.0 million (P35.1 million) as of December 31, 2012. The remaining RMB10.0 million (P67.6 million) was paid in March 2013. The other 45% of San Pin Wang is held by Guangxi Zong Kai Food Beverage Investment Company Limited ("GZK").

Subsequent to the acquisition date, the Jollibee Group and GZK contributed additional investments amounting to RMB11.0 million (P74.6 million). The balance of the liability for acquisition of San Pin Wang amounted to P72.1 million (RMB99.3 million) as at December 31, 2010. The remaining

A contingent consideration had been agreed as part of the purchase agreement with GZK. This consideration is contingent on meeting target net income after tax of San Pin Wang for the next three years. In May 2013, the Jollibee Group paid RMB7.5 million (P50.1 million) as the contingent consideration for the year 2012. In May 2015, another payment was made amounting to RMB6.8 million (P50.1 million) as the contingent consideration for the year 2014. The remaining contingent consideration is due for final measurement and payment to GZK in May 2016.

As at December 31, 2015 and 2014, accrual for contingent consideration from the acquisition of San Pin Wang amounted to P23.6 million (RMB38.1 million) and P72.1 million (RMB99.8 million), respectively.

Mang Inasal. On November 22, 2010, the Jollibee Group, through the Parent Company, acquired 70% of the issued and outstanding shares of Mang Inasal from Injap Investments, Inc. (the seller), owner and operator of Mang Inasal restaurant business in the Philippines, for a total acquisition cost of P2,976.2 million. The Jollibee Group paid P2,700.0 million as at December 31, 2010. The remaining 10%, net of deferred financing component, of the purchase price, is payable over a 3-year period as follows:

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Payment Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>50%</td>
<td>12 months from November 22, 2010 (closing date)</td>
</tr>
<tr>
<td>25%</td>
<td>24 months from closing date</td>
</tr>
<tr>
<td>25%</td>
<td>36 months from closing date</td>
</tr>
</tbody>
</table>

In 2014, the Jollibee Group has fully settled its liability for the acquisition of Mang Inasal.

Business Combination through Purchase of Assets

Chowking US Operations. On May 27, 2011, the Jollibee Group, through its wholly-owned subsidiary, TTC, entered into an Asset Purchase Agreement with Fortune Capital Corporation (FCC), owner and operator of all Chowking stores in the USA as the master licensee therein, to purchase the property and equipment, inventories and security deposits of the twenty (20) existing stores of FCC. The purchase consideration amounted to USD16.0 million (P993.3 million). The Jollibee Group paid USD12.0 million (P720.0 million) of the total consideration as of December 31, 2011, balance is payable over the next five (5) years.

The balance of the liability for acquisition of Chowking US operations amounted to USD0.7 million (P34.6 million) and USD1.4 million (P81.8 million) as at December 31, 2015 and 2014, respectively. The last installment is expected to be settled in May 2016.

With this acquisition, the Jollibee Group took a more active role to further the growth of the Chowking business in the USA.

B. Incorporation of New Subsidiaries

Honeybee Foods (Canada) Corporation (HFCC). On May 7, 2015, the Jollibee Group, through HFC, incorporated HFCC to own and operate Jollibee restaurants in Canada. As at December 31, 2015, no capital investment has been made other than the investment to incorporate.

Golden Cup Pte. Ltd. (Golden Cup). On December 19, 2014, the Jollibee Group, through JWPL, entered into a joint agreement to form Golden Cup together with Jasmine Asset Holding Ltd. (Jasmine), to own and operate Dunkin’ Donuts restaurants in the PRC.

JWPL owns 60% of the business and Jasmine owns the other 40%. JWPL and Jasmine have committed to invest up to USD300.0 million to the Joint Venture, of which up to USD180.0 million will be contributed by JWPL in proportion to its ownership in the business. Golden Cup was incorporated on December 22, 2014 but has not yet started commercial operations as at December 31, 2015.

As at December 31, 2015, capital contributions of the Jollibee Group to Golden Cup amounted to USD6.0 million (P266.4 million).

Pursuant to the Master Franchise Agreement signed on January 5, 2015 between Dunkin Donuts Franchising LLC and Golden Cup, a market entry fee amounting to USD2.1 million (P93.9 million) was paid by Golden Cup to Dunkin Donuts on the signing date (see Note 15).

C. Partly-owned Subsidiaries with Material Non-Controlling Interests

Financial information of subsidiaries that have material non-controlling interests are provided below:

Proportion of equity interest held by non-controlling interests:
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Country of incorporation and operation | 2015 | 2014
--- | --- | ---
Mang Inasal Philippines | 30% | 30%
HBFPPL Singapore | 30% | 30%
San Pin Wang People’s Republic of China | 45% | 45%

The summarized financial information of these subsidiaries is provided below. These information are based on amounts before intercompany eliminations.

Interests in Joint Ventures

SuperFoods Group. On January 20, 2012, upon fulfillment of certain legal and regulatory requirements in Vietnam, the Jollibee Group, through JWPL, acquired effective ownership of 50% share in the business of the SuperFoods Group (includes SF Vung Tau Joint Stock Company, Highlands Coffee Service JSC, Quantum Corp, Pho24 Corp., Blue Sky Holding Limited Hongkong, Sino Ocean Asia Limited Hongkong, Blue Sky Holdings Limited Macau, and China Co) through formation of joint ventures. This consists of a 49% share in SF Vung Tau Joint Stock Company, in Vietnam and a 60% share in Blue Sky Holding Limited in Hongkong (the SuperFoods Holding Companies). The formation of joint ventures is an implementation of the Framework Agreement made on May 20, 2011 between the Jollibee Group, through JSF, a 99% subsidiary of JWPL, and its co-venturers, Viet Thai International Joint Stock Company and Viet Thai International Company Limited. The SuperFoods Group operates the chain of Highlands Coffee shops, Pho 24 restaurants and Hard Rock Cafe stores, whose market is mostly in Vietnam, Hong Kong and Macau. The Framework Agreement provided for the Jollibee Group to contribute a total of USD25.0 million to gain 50% effective ownership in the joint ventures. Loans and deposits were made to the SuperFoods Group and the co-venturers prior to the formation of the joint ventures in 2012.

Pursuant to the Framework Agreement, the preliminary consideration for the 50% share in SuperFoods Group amounted to a cash payment of USD25.0 million in 2011.

On October 22, 2015, JSF contributed additional investment in SuperFoods amounting to USD0.7 million (P341.4 million). The Supplemental Agreement further provides that JWPL shall be required to pay the co-venturers an additional amount in 2016 based upon achieving a positive amount determined in accordance with a formula contained in the agreement (earn-out formula). Based on management’s assessment using the earn-out formula, no additional consideration needs to be recognized as at January 20, 2012, date of acquisition, and as at December 31, 2012 to 2015.

In accordance with the Framework Agreement, JWPL, through its 99%-owned subsidiary JSF, extended loans to the SuperFoods Group with the following details:

**Loans to Co-venturers**

Loan to the co-venturers in the SuperFoods Group joint venture amounting to USD35.0 million (P652.3 million), extended on June 30, 2011, is payable in June 2016. The loan bears interest of 5% per annum payable in lump sum also in June 2016. The loan was agreed to be used for general corporate purposes. Total interest from this loan recognized as interest income amounted to USD1.8 million (83.5 million), USD0.8 million (P0.5 million) and USD1.4 million (P5.9 million) for the years ended December 31, 2015, 2014 and 2013, respectively. The USD35.0 million loan is secured by a mortgage by the co-venturers of all their shares in SuperFoods Holding Companies.

On April 30, 2013, an additional loan was extended to the co-venturers in the SuperFoods Group amounting to USD1.0 million (P12.2 million) payable in February 2014 but was extended to December 2015. The loan bears interest of 5% per annum payable in lump sum also in December 2013. December 2015, the loan was further extended to June 2016, subject to 4.99% interest per annum. The loan was agreed to be used for general corporate purposes. Total interest from this loan recognized as interest income amounted to USD0.05 million (P2.6 million), USD0.05 million (P2.2 million) and USD0.03 million (P1.6 million) for the years ended December 31, 2015, 2014 and 2013, respectively.

On August 22, 2013, an additional loan was extended to the co-venturers in the SuperFoods Group amounting to USD1.0 million (P41.1 million) payable in August 2014. As of August 2014, the principal was subject to 5% interest per annum. However, with the extension to December 2015, the sum of principal and the accumulated interest as of August 2014 were subjected to 4.99% interest per annum. In December 2015, the loan was further extended to June 2016, subject to 4.99% The loan was agreed to be used for general corporate purposes. Total interest from this loan amounted to USD0.05 million (P2.5 million), USD0.05 million (P2.4 million) and USD0.02 million (P1.9 million) for the years ended December 31, 2015, 2014 and 2013, respectively.

Loan to Blue Sky

On June 10, 2011, a loan was extended to Blue Sky Holdings Limited (Blue Sky), the Hong Kong-based holding company, amounting to USD5.0 million (P216.0 million) payable in June 2014. As of June 2014, the principal was subject to 5% interest per annum. However, with the extension to December 2015, the sum of principal and the accumulated interest as of June 2014 were subjected to 4.99% interest per annum. In December 2015, the loan was further extended to June 2016, subject to 4.99%. Total interest from this loan recognized as interest income amounted to USD0.3 million (P13.9 million), USD0.3 million (P0.4 million) and USD0.3 million (P11.9 million) for the years ended December 31, 2015, 2014 and 2013, respectively.

On May 7, 2012, an additional loan was extended to Blue Sky amounting to USD2.5 million (P105.9 million) payable in May 2014. As of May 2014, the principal was subjected to 5% interest per annum. However, with the extension to December 2015, the sum of principal and the accumulated interest as of May 2014 were subjected to 4.99% interest per annum. In December 2015, the loan was further extended to June 2016, subject to 4.99%. Total interest from this loan amounted to USD0.1 million (P5.7 million), USD0.1 million (P6.1 million) and USD0.1 million (P6.0 million) for the years ended December 31, 2015, 2014 and 2013, respectively.

The carrying value of the loans to co-venturers and Blue Sky, including the accrued interest, amounted to P548.2 million and P231.9 million as of December 31, 2015 and 2014, respectively.

The details of the Jollibee Group’s interests in the SuperFoods joint venture and advances to co-venturers as at December 31, 2015 and 2014 are as follows:

SJBF LLC (SJBF). On October 8, 2015, the Jollibee Group, through JWPL, incorporated Bee Good! Inc. (BGI) in the state of Delaware, USA.

On October 13, 2015, BGI entered into an agreement with Smashburger Master LLC (Master) to acquire 40% of the outstanding equity interest of SJBF, the parent company of the entities comprising the Smashburger business, a fast casual better burger restaurant business based in the United States.

The consideration for BGI's 40% stake in SJBF amounted to USD99.5 million (P4,629.5 million). Thereafter, a post-closing adjustment of USD0.8 million (P36.6 million) to the purchase price at the closing date was recognized based on a pre-agreed mechanism with Master. The Jollibee Group settled with Master USD99.5 million (P4,629.5 million) of the transaction price in December 2015. The remaining USD0.8 million (P36.6 million) was carried as part of the "Current portion of liability for acquisition of business" account in the 2015 consolidated statement of financial position and was settled in January 2016. In addition, acquisition related costs consisting of professional fees for the Jollibee Group's financial, tax, accounting and legal advisors for the transaction amounted to P221.8 million.

The agreement between BGI and Master provides for a mechanism wherein Master can sell or BGI can purchase up to an additional 35% equity interest in SJBF (First Put / Call Right) between January 1, 2018 and January 1, 2021, and up to an additional 25% equity interest from the closing date or after expiration of the First Put / Call Right and five years thereafter (Second Put / Call Right). The purchase price of the remaining 60% will be based on the achievement of certain financial performance targets agreed between BGI and Master.

As a result of the first and second Put / Call Rights in the agreement, the Jollibee Group allocated P75.0 million of the purchase price to a derivative asset, representing the fair value of the First and Second Put / Call Rights on transaction date.

The details of Jollibee Group's interest in SJBF as at December 31, 2015 are as follows:

WJ Investments Limited (WJ). On August 22, 2012, the Jollibee Group, through JWPL and GPPL, entered into an agreement with Hopprime Ltd., a subsidiary of Wowprime Corporation of Taiwan (Wowprime) and some key executives of Wowprime, to establish a joint venture entity to own and operate the "12 Hotpot" brand in the People's Republic of China, Hong Kong and Macau. The "12 Hotpot" restaurant is known in Taiwan for its low-priced hotpot dishes.

The joint venture entity, incorporated as WJ Investments Limited (WJ), is 48%-owned by the Jollibee Group and 48%-owned by Wowprime's subsidiary and executives. The remaining 4% is owned by certain individuals with experience in the retail sector in China. Through their subsidiaries, Jollibee and Wowprime have joint control and management of WJ.

The Jollibee Group has invested USD2.4 million (P 98.0 million) in 2012. The first store started commercial operations in January 2013. The Jollibee Group made additional investments of USD3.1 million (P 138.2 million), USD1.7 million (P 75.0 million) and USD2.4 million (P 103.6 million) during 2015, 2014 and 2013, respectively.

The cost of fully depreciated property, plant and equipment still in use amounted to P 8,690.5 million and P 7,405.7 million as at December 31, 2015 and 2014, respectively.

Construction in progress account mainly pertains to costs incurred for ongoing construction of properties, including soon-to-open stores.

Provision for impairment losses on property, plant and equipment amounted to P 2.0 million in 2014 (see Note 22). No provisions for impairment losses were recognized in 2015.

In 2014 and 2013, management reassessed the recoverable amount of the Jollibee Group's office, store and food processing equipment which includes actual inspection of the Jollibee Group's existing assets, and recognized a reversal of provision amounting to P 16.2 million and P 13.3 million, respectively, based on fair value less cost to sell, presented under the "General and administrative expenses" account in the 2014 statement of comprehensive income (see Note 22).

In 2014, the Jollibee Group transferred certain units of a building with carrying amount ₱68.6 million as at December 31, 2014 from property, plant and equipment to investment property due to end of owner-occupation.

During 2015, the Jollibee Group reclassified its buildings held as investment property with a carrying amount of ₱20.5 million as at December 31, 2015 to property, plant and equipment due to the change in its use to owner-occupied property.

The cost of fully depreciated buildings and building improvements still being leased out by the Jollibee Group amounted to ₱182.0 million as at December 31, 2015 and 2014, respectively.

The Jollibee Group’s investment properties have an aggregate fair value of ₱1,414.3 million as at December 31, 2014 as determined by independent qualified appraisers. Management does not expect a significant change in the aggregate fair value of the Jollibee Group’s investment properties in 2015. The fair value represents the amount at which the assets and liabilities can be exchanged in an orderly transaction between market participants to sell the asset or transfer the liability at the measurement date under current market conditions in accordance with International Valuation Standards.

In determining the fair value of the investment properties, the independent appraisers used the market data approach for land and cost approach for buildings and building improvements. For land, fair value is based on sales and listings of comparable properties within the vicinity after adjustments for differences in location, size and shape of the lot, time elements and other factors between the properties and their comparable properties. For buildings and building improvements, fair value is based on the current cost to replace the properties in accordance with prevailing market prices for materials, labor, and contractors’ overhead, profit and fees in the locality after adjustments for depreciation due to physical deterioration, and functional and economic obsolescence based on personal inspection of the buildings and building improvements and in comparison to similar new properties. Fair value hierarchy disclosures for investment properties have been provided in Note 31.

Rent income derived from income-generating properties amounted to ₱92.4 million, ₱90.6 million and ₱97.5 million in 2015, 2014 and 2013, respectively (see Notes 20 and 29).
Direct operating costs relating to the investment properties which include depreciation and maintenance expenses totaled to ₱24.8 million, ₱24.5 million and ₱23.2 million in 2015, 2014 and 2013, respectively.

In 2014, the Company reversed the allowance for impairment loss recognized in 2011 amounting to ₱64.4 million for its land held as investment property as a result of the increase in the fair value of the asset compared to the carrying amount had there been no impairment loss recognized. The reversal of impairment loss is presented in the statement of comprehensive income (see Note 22).

No investment properties as at December 31, 2015 and 2014 have been pledged as security or collateral for the Jollibee Group’s debts.

14. GOODWILL AND OTHER INTANGIBLE ASSETS

**Goodwill and trademark**

Goodwill and trademark acquired through business combinations are attributable to the following group of CGUs as at December 31, 2015 and 2014:

Goodwill:
- Hong Zhuang Yuan: ₱2,497,252,906
- Mang Inasal: 1,781,266,639
- Red Ribbon Bakeshop:
  - Philippine operations: 737,939,101
  - US operations: 434,651,055
- Yong He King:
  - Yong He King: 429,016,109
  - Hangzhou Yonghe: 106,264,544
- Chowking US operations: 383,855,247
- San Pin Wang (see Note 11): 292,141,532
- Jinja Bar & Bistro: 154,894,001
- Burger King: 5,245,207

Total goodwill: 6,822,526,341

**Computer software**
The Jollibee Group’s computer software pertains to the Enterprise Resource Planning (ERP) system which the Jollibee Group started to use on August 1, 2014.

In 2015, the Jollibee Group conducted a reassessment of the useful life of its ERP system which resulted in a change in its expected usage. Considering the substantial amount of investment made by the Jollibee Group to implement the new application, the alternative applications currently available in the market and the Jollibee Group’s historical experience with its previous ERP system, management now expects and intends to use the new ERP application for ten (10) years from commissioning date. Management has previously estimated the expected useful life of the new ERP application at five (5) years. This change will result to annual amortization expense to be lower by ₱58.0 million in 2015, by ₱64.0 million in 2016 to 2018, and by ₱33.0 million in 2019; and amortization expense which is higher by ₱58.0 million in 2020 thereafter.

The rollforward analysis of the Jollibee Group’s computer software as at December 31 is as follows:

Impairment Testing of Goodwill and Trademark

Goodwill acquired through business combinations have been allocated to nine (9) groups of CGUs, which are subsidiaries of the Parent Company, owned directly or indirectly. The recoverable amounts of the groups of CGUs have been determined based on value in use calculations using cash flow projections from financial budgets approved by BOD covering a five-year period. Furthermore, the trademark of Mang Inasal is allocated to the CGU of Mang Inasal.

The calculation of value in use is most sensitive to the following assumptions which vary per geographical location:

<table>
<thead>
<tr>
<th>CGU</th>
<th>Geographical Location</th>
<th>Pre-tax Discount Rate</th>
<th>Long-term Growth Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hong Zhuang Yuan</td>

<td>12.4%</td>
<td>6.5%</td>
</tr>
</tbody>
</table>

Key assumptions with respect to the calculation of value in use of the groups of CGUs as at December 31, 2015 and 2014 used by management in its cash flow projections to undertake impairment testing of goodwill are as follows:

a) Discount rates - discount rates represent the current market assessment of the risks specific to each group of CGUs, regarding the time value of money and individual risks of the underlying assets which have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Jollibee Group's group of CGUs, derived from weighted average cost of capital (WACC) of each group of CGUs. The WACC takes into account both the cost of debt and equity. The cost of equity is calculated using the Capital Asset Pricing Model (CAPM). The cost of debt is based on the assumed interest-bearing borrowings: each group of CGUs is obliged to service. CGU-specific risk is incorporated by applying individual alpha and beta factors. The beta factors are evaluated annually based on publicly available market data.

b) Long-term growth rates - rates are determined in consideration of historical and projected results, as well as the economic environment where the group of CGUs operates.

c) Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) margin - is based on the most recent value achieved in the year preceding the start of the budget period, and adjusted for planned efficiency improvement, if any.

A rise in the pre-tax discount rate for Jinja Bar & Bistro to 12.0% (+4.0%) will result in impairment.

A reduction by 6.0% in the long-term growth rate for Jinja Bar & Bistro to -3.5% long-term growth rate decline would result to impairment.

Decreased demand can lead to a decline in the gross margin. A decrease in the gross margin of -3.5% and -2.1% from 2016 onwards would result in impairment for Jinja Bar & Bistro, respectively.

Management believes that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the carrying amount of the other groups of CGUs to exceed its recoverable amount.

No impairment losses were recognized for goodwill and trademark for the years ended December 31, 2015, 2014 and 2013.

Security and other deposits generally represent deposits for operating leases entered into by the Jollibee Group as lessee. The security deposits are recoverable from the lessors at the end of the lease terms, which range from three to twenty years. These are carried at amortized cost. The discount rates used range from 2.67%-5.50% in 2015 and 2014. The difference between the fair value at initial recognition and the notional amount of the security deposits is charged to “Deferred rent expense” account and amortized on straight-line basis over the lease terms.

Employees’ car plan receivables are presented at amortized cost. The difference between the fair value at initial recognition and the notional amount of the employees’ car plan receivables is recognized as deferred compensation and is amortized on a straight-line basis over the credit period.

Market entry fee represents upfront fee paid to the franchisor prior to the operations of Dunkin’ Donuts restaurants in the PRC for a period of twenty (20) years (see Note 11).

Other assets include tools for repairs and maintenance of office and store equipment which were still unused as at December 31, 2015 and 2014.

Accretion of interest on security and other deposits and employee car plan receivables amounted to ₱9.8 million, ₱25.2 million and ₱18.9 million in 2015, 2014 and 2013, respectively (see Note 23).

Trade payables to suppliers are noninterest-bearing and are normally settled on a 30 to 60-day term.

Accrued expenses are noninterest-bearing and are normally settled within the next financial year.

Customers’ deposits pertain to security deposits from operating leases with franchisees and subsidiaries, which are refundable at the end of the lease term.

Other current liabilities consist of stale checks, amounts payable for mascots and various subscriptions in newspapers given to customers as a complementary to their meals.

Accretion of interest on financial liabilities amounted to P19.9 million, P18.1 million and P19.1 million in 2015, 2014 and 2013, respectively (see Note 23).

17. PROVISIONS

The Jollibee Group has outstanding provisions amounting to P30.5 million as at December 31, 2015 and 2014, consisting mainly of provisions for asserted claims.

These include estimates of legal services, settlement amounts and other costs of claims made against the Jollibee Group. Other information on the claims are not disclosed as this may prejudice the Jollibee Group’s position on such claims.

18. SHORT AND LONG-TERM DEBTS

Short-term Debt
Short-term debt consists of unsecured bank loans as follows:

USD-denominated:

Loan 1. On February 12, 2015, JWPL availed a short-term loan amounting to USD6.0 million (P268.2 million) with an interest rate of 1.5%, subject to monthly repricing. The principal is payable on February 5, 2016. The loan was paid on its due date.

PHP-denominated:

Loans of the Parent Company: Loan 2 consists of a short-term loan amounting to P550.0 million availed on October 31, 2014 with an interest rate of 1.9% payable on January 30, 2015. The principal amount was paid in full on maturity date.

Loan 3 consists of a short-term loan amounting to P815.0 million availed on December 12, 2014 with an interest rate of 1.8% payable on January 12, 2015. The principal amount was paid in full on maturity date.

Loan 4 consists of a short-term loan amounting to P500.0 million availed on December 23, 2014 with an interest rate of 1.8% payable on January 30, 2015. The principal amount was paid in full on maturity date.
The Parent Company, Zenith and Mang Inasal also availed various short-term loans during the year. Details of the short-term debts availed and fully paid at maturity follow:

The details of long-term debt follow:

**USD-denominated loans of JWPL**

- Loan 1 consists of a 10-year unsecured loan acquired from a local bank on October 21, 2015 amounting to USD110.0 million (P5,111.7 million) subject to a variable interest rate based on three-month London Interbank Offered Rate (LIBOR) plus spread of 1.20% which is payable and is reset on a quarterly basis. The spread applies provided the Republic of the Philippines' 5-year credit default swap remains under 1.10%. As at December 31, 2015, the carrying value of the loan amounted to P5,176.6 million.

Under the loan agreement, the Parent Company as the guarantor is subject to certain debt covenants which include among others, maintaining a Debt-to-Equity ratio and Debt-to-EBITDA ratio of 3.0 or below.

- Loan 2 consists of a 5-year unsecured loan acquired on February 25, 2013 amounting to USD40.0 million (P1,632.0 million) subject to quarterly interest repricing with one-time option to fix in the future. The interest rate is based on three-month US Dollar LIBOR plus spread of 1.00%. The principal is payable in 16 quarterly installments commencing on May 26, 2014 up to February 26, 2018, the maturity date. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P1,058.9 million and P1,453.4 million, respectively.

- Loan 3 consists of a 4-year unsecured loan acquired on October 25, 2013 amounting to USD18.0 million (P777.8 million) with an interest rate based on three-month USD LIBOR plus spread of 1.00% subject to interest repricing every quarter. The principal is payable in 12 quarterly installment commencing on January 25, 2015 up to October 25, 2017, the date of maturity. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P564.7 million and P805.0 million, respectively.

- Loan 4 consists of a 10-year unsecured loan acquired from a local bank on May 8, 2013 amounting to USD163.3 million with an interest rate based on three-month US Dollar LIBOR plus spread of 1.00% subject to re-pricing every quarter. The principal is payable on May 7, 2018, the maturity date. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P1,882.2 million and P1,789.8 million, respectively.

- Loan 5 consists of a 5-year unsecured loan acquired on April 25, 2014 amounting to USD5.9 million (P257.5 million) with an interest rate of 1.48% subject to re-pricing every quarter. The principal is payable on April 24, 2019, the maturity date. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P277.7 million and P263.8 million, respectively.

- Loan 6 consists of a 5-year unsecured loan acquired on June 4, 2015 amounting to USD68.0 million (P383.2 million) with an interest rate of 1.15% subject to re-pricing every quarter. The principal is payable on May 28, 2020, the maturity date. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P293.0 million and P277.1 million, respectively.

The loan agreements above (Loans 2-3) provide certain restrictions and requirements with respect to maintaining financial ratios, which include Debt-to-Equity ratio which is not to exceed 1.5 and below and Debt Service Coverage ratio of at least 2.0. As at December 31, 2015 and 2014, JWPL is in compliance with the terms of its loan covenants.

**USD-denominated loans of HBFPPL**

- Loan 1 consists of a 5-year unsecured loan acquired on May 8, 2013 amounting to USD163.3 million with an interest rate based on three-month USD LIBOR plus spread of 1.00% basis points subject to re-pricing every quarter. The principal is payable on May 7, 2018, the maturity date. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P1,882.2 million and P1,789.8 million, respectively.

- Loan 2 consists of a 5-year unsecured loan acquired on April 25, 2014 amounting to USD5.9 million (or P257.5 million) with an interest rate of 1.48% subject to re-pricing every quarter. The principal is payable on April 24, 2019, the maturity date. As at December 31, 2015 and 2014, the carrying value of the loan amounted to P277.7 million and P263.8 million, respectively.

The loan agreements above (Loans 4-5) provide certain restrictions and requirements with respect to maintaining financial ratios, which include Debt-to-Equity ratio and Debt-to-EBITDA ratio not to exceed 3.0. As at December 31, 2015 and 2014, the HBFPPL is in compliance with the terms of its loan covenants.
PHP-denominated loans of the Parent Company: On December 9, 2013, the Parent Company refinanced its ₱1,500.0 million term loan from a local bank due on December 16, 2013 by availing a term loan of the same amount (Loan 6). The new loan is payable over five years and six months from the date of drawdown with annual principal repayments of ₱150.0 million starting on the 30th month from the date of drawdown and ₱455.0 million upon maturity. The loan is subject to a variable interest rate based on three-month Philippine Dealing System Treasury Fixing (PDST-F) rate plus spread of 1.25%, which is payable and is reset on a quarterly basis, and to an interest rate floor based on the Bangko Sentral ng Pilipinas (BSP) Overnight Reverse Repurchase Agreement Rate. The loan was drawn on December 16, 2013 and will mature on June 17, 2019. The Parent Company incurred debt issue costs of ₱7.5 million, representing documentary stamp tax, in relation to this loan in 2013.

Under the loan agreement, the Parent Company is subject to certain debt covenants which include among others, the maintenance of a required Debt-to-Equity ratio and Debt-to-EBITDA ratio of 3.0 or below. The Parent Company is in compliance with these debt covenants as at December 31, 2015 and 2014.

Loan 7 consists of a 5-year unsecured loan acquired from a local bank on April 21, 2014 amounting to ₱800.0 million. The loan is subject to a variable interest rate based on three-month PDST-F rate plus spread of 1.00%, and to an interest rate floor based on the BSP Special Deposit Account Rate plus spread of 1.00% or BSP Overnight Borrowing Rate plus spread of 1.0%. The Parent Company incurred debt issue costs of ₱10.0 million, representing documentary stamp tax, in relation to this loan in 2014. The principal is payable on April 21, 2019, the date of maturity.

Under the loan agreement, the Parent Company is subject to certain debt covenants which include, among others, maintaining a Debt-to-Equity ratio of 3.0 and below and Debt Service Coverage ratio of at least 3.0 and 1.3, respectively. The Parent Company is in compliance with these debt covenants as at December 31, 2015 and 2014.

The Parent Company’s PHP denominated long-term debt (Loans 6 and 7) amounts to ₱2,292.6 million and ₱2,290.4 million, net of unamortized debt issue cost of ₱7.4 million and ₱6.6 million as of December 31, 2015 and 2014, respectively. The current portion is payable in 2016 amounting to ₱150.0 million, net of debt issue costs of ₱0.05 million as of December 31, 2015.

PHP-denominated loan of PERF Restaurants, Inc. (PERF). Loan 8 is a 5-year unsecured USD3.4 million (or ₱492.2 million) bearing fixed interest rate of 5.32% per annum. The principal is payable on December 20, 2016.

The loan contains certain restrictive covenants and requirements with respect to the following:
(a) Maintenance of the following ratios for the duration of the loan agreements: (1) minimum debt service coverage of 1.5:1, and (2) maximum debt to EBITDA of 4:1.
(b) Restrictions on charges in ownership structure; incurrence of any additional loans with term of more than one year; repayment of intercompany borrowings from the Parent Company except those agreed upon signing of this Facility Agreement; investing or entering into any business substantially different from the business in which PERF is presently engaged; and enter into merger or consolidation, except where PERF is the surviving corporation, and the Parent Company remains as the majority beneficial owner of the surviving corporation.

As at December 31, 2015, PERF ratios of debt service coverage cost and debt to EBITDA is 0.43:1 and 2.43:1, respectively. The loan is part of the current portion of the long-term debt.

Interest expense recognized on long-term debt including amortization of debt issue cost, amounted to ₱332.0 million, ₱31.2 million and ₱33.8 million in 2015, 2014 and 2013, respectively (see Note 23).

</tbody>
</table>

Embedded Derivatives
Certain long-term loans of the Jollibee Group include provisions for an option to convert the variable interest rate into a fixed interest rate. Certain long-term loans are also subject to an interest rate floor. In addition, the Jollibee Group’s long-term loans generally provide an option to pre-pay the loan in full before the maturity date.

The Jollibee Group assessed that the derivatives embedded in the loan contract need not be bifurcated since they are clearly and closely related to the economic characteristics and risks of the host loan contract and do not qualify for separate accounting as at December 31, 2015 and 2014.

Freestanding Derivatives, Hedges and Hedge Effectiveness Testing
On November 20, 2015, the Jollibee Group entered into an Interest Rate Swap (IRS) with a bank to convert its exposure in the variable interest rate of Loan 1 to a fixed interest rate. The IRS will terminate and the loan will mature simultaneously on October 21, 2025. The Jollibee Group has designated the IRS as a cash flow hedge.

The IRS with a notional amount equal to the principal amount of the loan requires the Jollibee Group to pay fixed interest payments at 3.36% in exchange of variable interest payments at three-month LIBOR plus spread of 1.20% from the bank throughout the term of the IRS on the notional amount. The IRS settles quarterly on a net basis.

The fair value of the IRS amounted to a ₱34.9 million liability, which was presented as a derivative liability in the 2015 statement of financial position. The terms of the IRS approximately match the terms of the interest payments on the loan. Accordingly, there is no hedge ineffectiveness to be recognized in profit or loss. An unrealized loss of ₱34.9 million was recognized in under other comprehensive income in 2015.
In 2012, Loan 7 was converted into a deliverable cross-currency swap transaction to hedge in full the foreign currency risk and interest rate risk on its floating rate. Under the cross-currency swap, PERF received at inception PHP notional amount of P149.2 million and paid USD notional amount of USD3.4 million based on the PHP/USD spot reference rate of P43.87. At every interest payment date, PERF will receive variable interest based on 3-month US Dollar LIBOR plus spread and will pay fixed interest rate. At maturity date, PERF will receive USD notional amount of USD3.4 million and pay PHP notional amount of P149.2 million. The USD receipts from the cross-currency swap correspond to the expected interest fixed principal amount due on the hedged loan. Similar to the hedged loan, the cross-currency swap is non-amortizing and will mature on December 21, 2016.

Effectively, the cross-currency swap transformed the floating rate USD loan into a fixed rate PHP loan.

The fair value of the cross-currency swap resulted to a derivative asset amounting to P9.9 million in 2015, and a derivative liability amounting to P1.5 million in 2014.

Since the critical terms of the hedged loan and cross-currency swap matched, the hedge was assessed to be highly effective. As such, there was no ineffectiveness recognized in the profit or loss for the years ended December 31, 2015, 2014 and 2013.

The movements in fair value of cash flow hedges relative to the cross-currency swap presented in equity under other comprehensive loss in 2015 and 2014 follow:

<table>
<thead>
<tr>

The total number of shareholders of the Parent Company is 3,118 and 3,173 as at December 31, 2015 and 2014, respectively.

b. Additional Paid-in-Capital

The movements in the Additional paid in capital pertain to the difference between the exercised prices of stock options exercised and the par value of Parent Company’s shares. In 2015, 2014 and 2013, stock options totaling 5,109,096 shares, 12,431,639 shares and 4,749,116 shares, respectively, were exercised (see Note 26). These resulted to an additional paid in capital amounted to P429.9 million, P645.0 million and P206.2 million in 2015, 2014 and 2013, respectively.

Stock options expense, amounting to P173.2 million, P166.5 million and P150.4 million in 2015, 2014 and 2013 were also recognized as part of additional paid in capital (see Notes 22 and 26).

As at December 31, 2015 and 2014, total additional paid in capital amounted to P5,055.3 million and P4,452.2 million, respectively.

c. Treasury Shares

The cost of common stock of the Parent Company held in treasury of P180.5 million consists of 16,447,340 shares as at December 31, 2015 and 2014.
d. Excess of Cost over the Carrying Value of Non-controlling Interests Acquired

The amount of excess of cost over the carrying value of non-controlling interests acquired as at December 31, 2015 and 2014, recognized as part of “Equity Attributable to Equity Holders of the Parent Company” section in the consolidated statements of financial position, resulted from the following acquisitions of non-controlling interests:

20% of Greenwich in 2006 P168,257,659
15% of Belmont in 2007 375,720,914
40% of Adgraphix in 2010 (1,214,087)

Total P42,764,486

An important part of the Jollibee Group’s growth strategy is the acquisition of new businesses in the Philippines and abroad. Examples were acquisitions of 85% of Yonghe King in 2004 in PRC (P1,200.0 million), 100% of Red Ribbon in 2005 (P1,700.0 million), the remaining 20% minority share in Greenwich in 2007 (P384.0 million), the remaining 15% share of Yonghe King in 2007 (P113.7 million), 100% of Hong Zhuang Yuan restaurant chain in PRC in 2008 (P2,600.0 million), 70% of Mang Inasal in 2010 (P2,976.2 million), 100% of Chowking US operations in 2011 (P393.3 million), 55% of San Pin Wang in 2012 (P195.9 million plus a contingent consideration), 48% of WJ Investments Limited (P80.0 million) in 2012 and 40% of SJBF LLC, the parent company of the entities comprising the Smashburger business (P812.8 million), including transaction costs, in 2015.

The Jollibee Group plans to continue to make substantial acquisitions in the coming years. The Jollibee Group uses its cash generated from operations to finance these acquisitions and capital expenditures. These limit the amount of cash dividends that it can declare and pay, making the level of the retained earnings higher than the paid-up capital stock.

In support of the Jollibee Group’s strategy, the BOD approved an additional appropriation of P5,200.0 million, P3,800.0 million and P1,200.0 million on April 11, 2013, February 15, 2012 and in 2009, respectively, for future acquisitions and capital expenditures. Details of the appropriated retained earnings as at December 31, 2015 and 2014 follow:

The Jollibee Group has existing Royalty and Franchise Agreements with independent franchisees for the latter to operate quick service restaurant outlets under the “Jollibee”, “Chowking”, “Greenwich”, “Red Ribbon”, “Mang Inasal”, “Yong He King” and “Hong Zhuang Yuan” concepts and trade names. In consideration thereof, the franchisees agree to pay franchise fees and monthly royalty fees equivalent to a certain percentage of the franchisees’ net sales.

Other revenues pertain to delivery fees and other miscellaneous revenues earned by the Jollibee Group.

</tr>
</tbody>
</table>

The availment of the OSD method also affected the recognition of several deferred tax assets and liabilities. Deferred tax assets and liabilities, for which the related income and expense are not considered in determining gross income for income tax purposes, are not recognized. This is because the manner by which the Jollibee Group expects to recover or settle the underlying assets and liabilities, for which the deferred tax assets and liabilities were initially recognized, would not result to any future tax consequence under the OSD method. Meanwhile, deferred tax assets and liabilities, for which the related income and expense are considered in determining gross income for income tax purposes, are recognized only to the extent of their future tax consequence under OSD method. Hence, the tax base of these deferred tax assets and liabilities is reduced by the 40% allowable deduction provided for under the OSD method.
Accordingly, the Jollibee Group’s deferred tax assets and liabilities, which were not recognized due to the use of the OSD method, are as follows:

### Deferred Tax Assets:

25. **PENSION LIABILITY**

**Defined Benefit Plan**

The Parent Company and certain Philippine-based subsidiaries have funded, independently-administered, non-contributory defined benefit pension plan covering all permanent employees. The benefits are based on the employees’ projected salaries and number of years of service.

The funds are administered by trustee banks. Subject to the specific instructions provided by the Jollibee Group in writing, the Jollibee Group directs the trustee banks to hold, invest and reinvest the funds and keep the same invested, in its sole discretion, without distinction between principal and income in, but not limited to, certain government securities and bonds, term loans, short-term fixed income securities and other loans and investments.

Under the existing regulatory framework, Republic Act No. 7641 requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity, provided however that the employees’ retirement benefits under any collective bargaining and other agreements shall not be less than those provided under the law. The law does not require minimum funding of the plan.

The following tables summarize the components of pension expense, included under “Cost of sales” and “General and administrative expenses” accounts in the consolidated statements of comprehensive income and pension liability in the consolidated statements of financial position, which are based on actuarial valuations.

**Changes in pension liability of the Jollibee Group in 2015** are as follows:

<table>
<thead>
<tr>
<th>Present Value of Defined Benefit Obligation</th>
<th>Fair Value of Plan Assets</th>
<th>Pension Liability</th>
</tr>
</thead>

</table>

Total                                                ₱1,532,621,755  ₱1,496,821,472

The plan assets consist of the following:

- Investments in government securities which consist of retail treasury bonds that bear interest ranging from 2.35%-8.13% and have maturities from February 2015 to August 2037 and fixed-rate treasury notes that bear interest ranging from 2.88%-11.70% and have maturities from September 2016 to October 2037.
- Investments in equity securities consist of investments in listed equity securities, including equity securities of the Parent Company, for certain retirement plans of the Jollibee Group (see Note 27).
- Investments in debt securities consist of long-term corporate bonds in the power sector, which bear interest ranging from 6.30%-7.75% maturing from April 2017 to April 2037.
- Other financial assets held by the retirement plan are primarily accrued interest income on cash and cash equivalents, debt instruments and other securities.

Pension expense as well as the present value of the pension liability are determined using actuarial valuations. The actuarial valuation involves making various assumptions. The principal assumptions used in determining pension expense and liability for the defined benefit plans are shown below:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount rate</td>
<td>5.00% - 5.10%</td>
<td>4.60% - 4.70%</td>
<td>5.00% - 6.00%</td>
</tr>
<tr>
<td>Salary increase rate</td>
<td>6.00%</td>
<td>7.00%</td>
<td>6.50% - 7.11%</td>
</tr>
</tbody>
</table>

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the present value of the defined benefit obligation as of the end of the reporting period, assuming all other assumptions were held constant:

The Jollibee Group does not have a formal asset-liability matching strategy. The overall investment policy and strategy of the retirement plan is based on the client suitability assessment, as provided by its trustee banks, in compliance with the Bangko Sentral ng Pilipinas requirements. Nevertheless, the Jollibee Group ensures that there will be sufficient assets to pay the retirement benefits as they fall due while attempting to mitigate the various risks of the plan.
The plan assets are primarily exposed to financial risks such as liquidity risk and price risk. Liquidity risk pertains to the plan’s ability to meet its obligation to the employees upon retirement. To effectively manage liquidity risk, the trustee banks maintain assets in cash and short-term deposits. Price risk pertains mainly to fluctuation in market prices of the retirement funds marketable securities. In order to effectively manage price risk, the trustee banks continuously assess these risks by closely monitoring the market value of the securities and implementing prudent investment strategies.

The Jollibee Group expects to contribute ₱424.3 million to the defined benefit pension plans in 2016.

The average duration of the defined benefit obligation is 10 years as at December 31, 2015 and 2014.

**Defined Contribution Plan**

The employees of the PRC-domiciled and USA-based subsidiaries of the Jollibee Group are members of a state-managed pension benefit scheme operated by the national governments. These subsidiaries are required to contribute a specified percentage of their payroll costs to the pension benefit scheme to fund the benefits. The only obligation of these subsidiaries with respect to the pension benefit scheme is to make the specified contributions.

The contributions made to the scheme and recognized as part of other employee benefits amounted to ₱354.4 million in 2014.

### STOCK OPTION PLANS

**Senior Management Stock Option and Incentive Plan**

On December 17, 2002, the SEC approved the exemption requested by the Jollibee Group on the registration requirements of the 101,500,000 options underlying the Parent Company’s common shares to be issued pursuant to the Jollibee Group’s Senior Management Stock Option and Incentive Plan (the Plan). The Plan covers selected key members of management of the Jollibee Group.

The Plan is divided into two programs, namely, the Management Stock Option Program (MSOP) and the Executive Long-term Incentive Program (ELTIP). The MSOP provides a yearly stock option grant program based on company and individual performance while the ELTIP provides stock ownership as an incentive to reinforce entrepreneurial and long-term ownership behavior of executive participants.

MSOP: The MSOP is a yearly stock option grant program open to members of the senior management committee of the Jollibee Group and members of the management committee, key talents and designated consultants of some of the business units.

Each MSOP cycle refers to the period commencing on the MSOP grant date and ending on the last day of the MSOP exercise period. Vesting is conditional on the employment of the employee-participants in the Jollibee Group within the vesting period. The options will vest at the rate of one-third of the total options granted on each anniversary of the MSOP grant date until the third anniversary.

The exercise price of the stock options is determined by the Jollibee Group with reference to prevailing market prices over the three months immediately preceding the date of grant for the 1st up to the 7th MSOP cycle. Starting with the 8th MSOP cycle, the exercise price of the option is determined by the Jollibee Group with reference to the market closing price at date of grant.

For instance, on July 1, 2004, the Compensation Committee of the Jollibee Group granted 2,385,000 options under the 1st MSOP cycle to eligible participants. The options will vest at the rate of one-third of the total options granted from the start of the grant date on each anniversary date which will start after a year from the grant date. One-third of the options granted, or 795,000 options, vested and may be exercised starting July 1, 2005 and expired on June 30, 2012. From July 1, 2005 to 2015, the Compensation Committee granted series of MSOP grants under the 2nd to 12th MSOP cycle to eligible participants.

On August 25, 2015, the Compensation Committee granted 3,142,600 options under the 12th MSOP cycle to eligible participants. These options are similar to the 1st MSOP cycle. The 2nd, 3rd and 4th MSOP cycles expired on June 30, 2013, 2014 and 2015, respectively.

The movements in the number of stock options outstanding and related weighted average exercise prices (WAEP) are as follows:

<table>
<thead>
<tr>

</tbody>
</table>

The weighted average share price of the Parent Company common shares is P₱261.34 and P₱181.34 and P₱143.27 in 2015, 2014 and 2013, respectively. The weighted average remaining contractual life for the stock options outstanding as of December 31, 2015, 2014 and 2013 is 5.19 years, 5.83 years and 4.83 years, respectively.

The weighted average fair value of stock options granted in 2015, 2014 and 2013 is P₱36.13, P₱32.39 and P₱30.55, respectively. The fair value of share options as at the date of grant is estimated using the Black-Scholes Option Pricing Model, taking into account, the terms and conditions upon which the options were granted. The option style used for this plan is the American style because the option plan allows exercise before the expiry date. The inputs in the valuation of the options granted on the dates of grant for each MSOP cycle are shown below:

<table>

The expected life of the stock options is based on historical data and current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the options is indicative of future trends, which may also not necessarily be the actual outcome.

Eligibility of employees to participate in the Jollibee Group’s stock option plans is determined on the basis of performance achievement. Each ELTIP cycle refers to the period commencing on the ELTIP entitlement date and ending on the last day of the ELTIP exercise period. Actual grant and vesting is conditional upon achievement of the Jollibee Group’s minimum medium to long-term goals and individual targets in a given period, and the employment of the employee-participants in the Jollibee Group within the vesting period. If the goals are achieved, the options will be granted. For the 3rd ELTIP cycle, a percentage of the options to be granted are based on the percentage of growth in annual earnings per share such that 100%, 50% or 25% of the options granted when percentage of growth in annual earnings per share are 12% and above, 10% to less than 12% or 8% to less than 10%, respectively. For the upcoming 4th ELTIP cycle, the percentage of the options to be granted are based on the percentage of growth in annual earnings per share which have been further revised such that 100%, 50% or 25% of the options granted when percentage of growth in annual earnings per share are 15% and above, 10% to less than 15% or 8% to less than 12%, respectively. If the employment of the employee-participants in the Jollibee Group within the vesting period. If the goals are achieved, the options will be granted. For the 3rd ELTIP cycle, a percentage of the options to be granted are based on the percentage of growth in annual earnings per share such that 100%, 50% or 25% of the options granted when percentage of growth in annual earnings per share are 12% and above, 10% to less than 12% or 8% to less than 10%, respectively. For the upcoming 4th ELTIP cycle, the percentage of the options to be granted are based on the percentage of growth in annual earnings per share which have been further revised such that 150%, 100% or 50% of the options granted when percentage of growth in annual earnings per share are 15% and above, 10% to less than 15% or 8% to less than 12%, respectively.

The expected life of the stock options is assumed to be 4.85 years, 4.85 years and 5.30 years, respectively.

The Jollibee Group does not pay cash as a form of settlement.
27. RELATED PARTY TRANSACTIONS

The Jollibee Group has transactions with related parties. Enterprises and individuals that directly, or indirectly through one or more intermediaries, control or are controlled by, or under common control with the Jollibee Group, including holding companies, subsidiaries and fellow subsidiaries are related entities of the Jollibee Group. Individuals owning, directly or indirectly, an interest in the voting power of the Jollibee Group that give them significant influence over the enterprise; key management personnel, including directors and officers of the Jollibee Group, and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

Compensation of Key Management Personnel of the Jollibee Group

The aggregate compensation and benefits to key management personnel of the Jollibee Group in 2015, 2014 and 2013 are as follows:

<table>

</table>

There were no anti-dilutive options outstanding as at December 31, 2015 and 2014.

29. COMMITMENTS AND CONTINGENCIES

a. Operating lease commitments - Jollibee Group as lessee

The Jollibee Group has various operating lease commitments for quick service restaurant outlets and offices. The noncancellable periods of the leases range from 3 to 20 years, mostly containing renewal options. Some of the leases contain escalation clauses. The lease contracts on certain sales outlets provide for the payment of additional rentals based on certain percentages of sales of the outlets. Contingent rent expense amounted to P1,428.2 million, P1,322.5 million and P1,447.0 million in 2015, 2014 and 2013, respectively.
The future minimum lease payments for the noncancellable periods of the operating leases follow:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
<th>2013</th>
</tr>
</thead>
<tbody>
<tr>
<td>Within one year</td>
<td>P1,532,583,258</td>
<td>P1,669,685,353</td>
<td>P2,500,831,215</td>
</tr>
<tr>
<td>After one year but not more than five years</td>
<td>5,581,731,024</td>
<td>6,449,432,284</td>
<td>8,090,153,478</td>
</tr>
<tr>
<td>More than five years</td>
<td>6,443,630,529</td>
<td>4,897,338,004</td>
<td>3,911,301,278</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>13,557,944,811</strong></td>
<td><strong>13,016,456,841</strong></td>
<td><strong>14,502,285,971</strong></td>
</tr>
</tbody>
</table>

Rent expense recognized on a straight-line basis amounted to P7,841.9 million, P7,072.7 million and P6,287.3 million in 2015, 2014 and 2013, respectively (see Notes 21 and 22). The difference of rent expense recognized under the straight-line method and the rent amounts due in accordance with the terms of the lease agreements are charged to “Operating lease payables” account which amounted to P1,615.6 million and P1,544.8 million as at December 31, 2015 and 2014, respectively.

b. Operating lease commitments - Jollibee Group as lessor

The Jollibee Group entered into commercial property leases for its investment property units and various sublease agreements. Noncancellable periods of the leases range from 3 to 20 years, mostly containing renewal options. Leases generally include a clause to enable upward revision of the rent charges on an annual basis based on prevailing market conditions.

The future minimum lease payments for the noncancellable periods of the operating leases, wherein Jollibee Group is the lessor, follow:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
<th>2013</th>
</tr>
</thead>
<tbody>
<tr>
<td>Within one year</td>
<td>P63,358,455</td>
<td>P55,256,411</td>
<td>P46,453,095</td>
</tr>
<tr>
<td>After one year but not more than five years</td>
<td>244,123,192</td>
<td>199,537,668</td>
<td>157,623,110</td>
</tr>
<tr>
<td>More than five years</td>
<td>598,950,095</td>
<td>432,610,032</td>
<td>359,274,585</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>906,431,742</strong></td>
<td><strong>687,410,111</strong></td>
<td><strong>563,350,790</strong></td>
</tr>
</tbody>
</table>

Rent income recognized on a straight-line basis amounted to P97.5 million in 2015, 2014 and 2013, respectively (see Note 20). The difference of rent income recognized under the straight-line method and the rent amounts due in accordance with the terms of the lease are included under “Operating lease receivables” which amounted to P12.5 million and P21.1 million as at December 31, 2015 and 2014, respectively.

c. Contingencies

The Jollibee Group is involved in litigations, claims and disputes which are normal to its business. Management believes that the ultimate liability, if any, with respect to these litigations, claims and disputes will not materially affect the financial position and financial performance of the Jollibee Group. Thus, other than the provisions in Note 17, there were no other provisions made for contingencies.

Foreign Currency Risk

The Jollibee Group’s exposure to foreign currency risk arises from the Parent Company’s investments outside the Philippines, which are mainly in PRC and USA. The net assets of foreign businesses account for only 6.23% and 9.12% of the consolidated net assets of the Jollibee Group as at December 31, 2015 and 2014, respectively, and the businesses have been rapidly growing.

The Jollibee Group also has transactional foreign currency exposures. Such exposure arises from the Jollibee Group’s Philippine operations’ cash and cash equivalents, receivables and long-term debt in foreign currencies.

The following table shows the Jollibee Group’s Philippine operations’ foreign currency-denominated monetary assets and liabilities and their peso equivalents as at December 31, 2015 and 2014:

<table>
<thead>
<tr>
<th>2015</th>
<th>2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>USD</td>
<td>RMB Equivalent</td>
</tr>
<tr>
<td>Assets</td>
<td></td>

</tr>
<tr>
<td>Liabilities</td>
<td>-152,048,000</td>
</tr>
<tr>
<td>839,318</td>
<td>8,076</td>
</tr>
</tbody>
</table>

Foreign Currency Risk Sensitivity Analysis

The Jollibee Group has recognized in profit or loss, foreign currency exchange gains (losses) included under “Other income” account which amounted to a net foreign exchange gain of ₱36.8 million and ₱46.6 million in 2015 and 2013, respectively, and net foreign exchange loss of ₱1.1 million on its net foreign currency-denominated assets in 2014 (see Note 23). This resulted from the movements of the Philippine peso against the USD and RMB as shown in the following table:

<table>
<thead>
<tr>
<th>December 31, 2015</th>
<th>USD</th>
<th>RMB</th>
</tr>
</thead>
<tbody>
<tr>
<td>47.06</td>
<td>7.27</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>

**Equity Price Risk**

The Jollibee Group is not exposed to significant equity price risk on its investment in quoted equity securities consisting of investment in club shares.

**Credit Risk**

Credit risk is the risk that a customer or counterparty fails to fulfill its contractual obligations to the Jollibee Group. This includes risk of non-payment by borrowers, failed settlement of transactions and default on outstanding contracts.

The Jollibee Group has a strict credit policy. Its credit transactions are with franchisees and customers that have gone through rigorous screening before granting them the franchise. The credit terms are very short, while deposits and advance payments are also required before rendering the service or delivering the goods; thus, mitigating the possibility of non-collection. In cases of non-collection, defaults of the debtors are not tolerated; the exposure is contained the moment a default occurs and transactions that will further increase the exposure of the Jollibee Group are discontinued.

The Jollibee Group has no significant concentration of credit risk with counterparty. The Jollibee Group's franchisee profile is such that no single franchisee accounts for more than 5% of the total system wide sales of the Jollibee Group.

The aging analysis of loans and receivables as at December 31, 2015 and 2014 are as follows:

</table>

With respect to credit risk arising from financial assets of the Jollibee Group, the Jollibee Group’s exposure to credit risk arises from default of the counterparty, with a gross maximum exposure equal to the carrying amount of these instruments.

Credit Quality. The tables below show the credit quality by class of financial assets that are neither past due nor impaired, based on the Jollibee Group’s credit rating system as at December 31, 2015 and 2014.

The credit quality of financial assets is managed by the Jollibee Group using internal credit ratings, as shown below:

A - For counterparty that is not expected by the Jollibee Group to default in settling its obligations, thus, credit risk exposure is minimal. This counterparty normally includes financial institutions, related parties and customers who pay on or before due date.

B - For counterparty with tolerable delays (normally from 1 to 30 days) in settling its obligations to the Jollibee Group. The delays may be due to cut-off differences and/or clarifications on contracts/billings.
C. For counterparty who consistently defaults in settling its obligation, but with continuing business transactions with the Jollibee Group, and may be or actually referred to legal and/or subjected to cash before delivery (CBD) scheme. Under this scheme, the customer’s credit line is suspended and all subsequent orders are paid in cash before delivery. The CBD status will only be lifted upon full settlement of the receivables and approval by management. Thereafter, the regular credit term and normal billing and collection processes will resume.

Liquidity Risk
The Jollibee Group's exposure to liquidity risk refers to the risk that its financial liabilities are not serviced in a timely manner and that its working capital requirements and planned capital expenditures are not met. To manage this exposure and to ensure sufficient liquidity levels, the Jollibee Group closely monitors its cash flows to be able to finance its capital expenditures and to pay its obligations as and when they fall due.

On a weekly basis, the Jollibee Group’s Cash and Banking Team monitors its collections, expenditures and any excess/deficiency in the working capital requirements, by preparing cash position reports that present actual and projected cash flows for the subsequent week. Cash outflows resulting from major expenditures are planned so that money market placements are available in time with the planned major expenditure. In addition, the Jollibee Group has short-term cash deposits and has available credit lines with accredited banking institutions, in case there is a sudden deficiency. The Jollibee Group closely monitors its cash flows to be able to finance its capital expenditures and to pay its obligations as and when they fall due.

The Jollibee Group's financial assets, which have maturity of less than 12 months and are used to meet its short-term liquidity needs, are cash and cash equivalents, short-term investments and trade receivables amounting to ₱9,758.6 million, respectively, as at December 31, 2015 and 2014.

The tables below summarize the maturity profile of the Jollibee Group’s financial liabilities based on the contractual undiscounted cash flows as at December 31, 2015 and 2014:

*Excluding statutory obligations such as accrued local and other taxes, PHIC, SSS, HDMF and NHMFC payables and unearned revenue from gift certificates.

Capital Management Policy
Capital includes equity attributable to equity holders of the Parent Company.

The primary objective of the Jollibee Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Jollibee Group has sufficient capitalization.

The Jollibee Group generates cash flows from operations sufficient to finance its organic growth. It declares cash dividends representing at least one-third of its consolidated net income, a ratio that would still leave some additional cash for future expansion. If needed, the Jollibee Group would borrow money for acquisitions of new businesses.

As at December 31, 2015 and 2014, the Jollibee Group’s debt ratio and net debt ratio are as follows:

<table>
<thead>
<tr>
<th>Debt Ratio</th>
<th>2015</th>
<th>2014</th>

31. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at measurement date.

Financial Instruments Whose Carrying Amounts Approximate Fair Value. Management has determined that the carrying amounts of cash and cash equivalents, short-term investments, receivables, operating lease receivables, trade payables and other current liabilities, short-term debt, operating lease payables, current portion of liability for acquisition of businesses, based on their notional amounts, reasonably approximate their fair values because of their short-term nature or due to the immaterial effect of discounting when the present value of future cash flows from these instruments are calculated.

AFS Financial Assets. The fair value of investments in quoted shares of stock is based on quoted prices. The Jollibee Group does not have the intention to dispose these financial assets in the near term.

Investment Properties. The fair value of the investment properties are determined by independent appraisers using the market data and cost approach, which considers the local market conditions, the extent, character and utility of the property, sales and holding prices of similar parcels of land and the highest and best use of the investment properties.

Security Deposits, Employee Car Plan Receivables, Long-term Debt, Liability for Acquisition of Business and Derivative Assets or Liabilities. Management has determined that the estimated fair value of security and other deposits, noncurrent portion of employee car plan receivables, long-term debt, liability for acquisition of business (contingent consideration) and derivative assets or liability are based on the discounted value of future cash flows using applicable rates as follows:

<table>
<thead>
<tr>
<th></th>
<th>2015</th>
<th>2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>Security and other deposits</td>
<td>2.37%-7.25%</td>

32. EVENTS AFTER THE REPORTING PERIOD

Dividend Declaration

Parent Company. On April 6, 2016, the BOD approved a regular cash dividend of P 0.86 per share of common stock to all stockholders of record as of April 21, 2016. Consequently, the cash dividend is expected to be paid out by May 6, 2016. The cash dividend is 7.5% higher than the P 0.80 regular dividend a share declared in April 2015.

Appropriation of Retained Earnings

Parent Company. On April 6, 2016, the BOD approved an additional appropriation of P 8,000.0 million for capital expenditures for the years 2016 to 2018. Consequently, the appropriated earnings of the Parent Company will increase from P 10,200.0 million to P 18,200.0 million.

Payment of Loans

JWPL. On February 5, 2016, JWPL settled its short-term loan amounting to USD6.0 million (P 286.0 million), and paid interest of P 1.0 million.

Acquisition

JWPL. On February 23, 2016, JWPL entered into an agreement with Hua Xia Harvest Holdings Pte. Ltd. ("Hua Xia") to acquire Hua Xia’s 30% equity shareholding in its subsidiary, HBFPPL. With the acquisition, JWPL shall own 100% of HBFPPL. Payment for the acquisition is approximately USD10.4 million (P 495.4 million).
